

Climate Change and Development Authority

INSTITUTIONAL ARRANGEMENTS FOR TRANSPARENCY SYSTEMS

BEST PRACTICES AND LESSONS LEARNED FROM PAPUA NEW GUINEA

26th April 2023

Jason Paniu

**MRV and National Communications Division
Climate Change and Development Authority**

Presentation Outline

- ✓ Background
- ✓ CCDA's Responsibilities
- ✓ Sub-Technical Working Committees
- ✓ GHG Inventory Team
- ✓ GHG Data Sharing Arrangement
- ✓ Areas of Improvement

Background

- Papua New Guinea submitted its NC1 in 2002, NC2 in 2015, BUR1 in 2019 and BUR2 (including NIR) in 2022
- NC1 and NC2 were prepared on a project basis
- Preparation of NCs and BURs including GHG inventories were institutionalized in 2015.
- The Climate Change and Development Authority (CCDA) is the mandated entity for preparing these reports
- CCDA was able to prepare the BUR1 and BUR2 (including NIR) with technical support from JICA and FAO

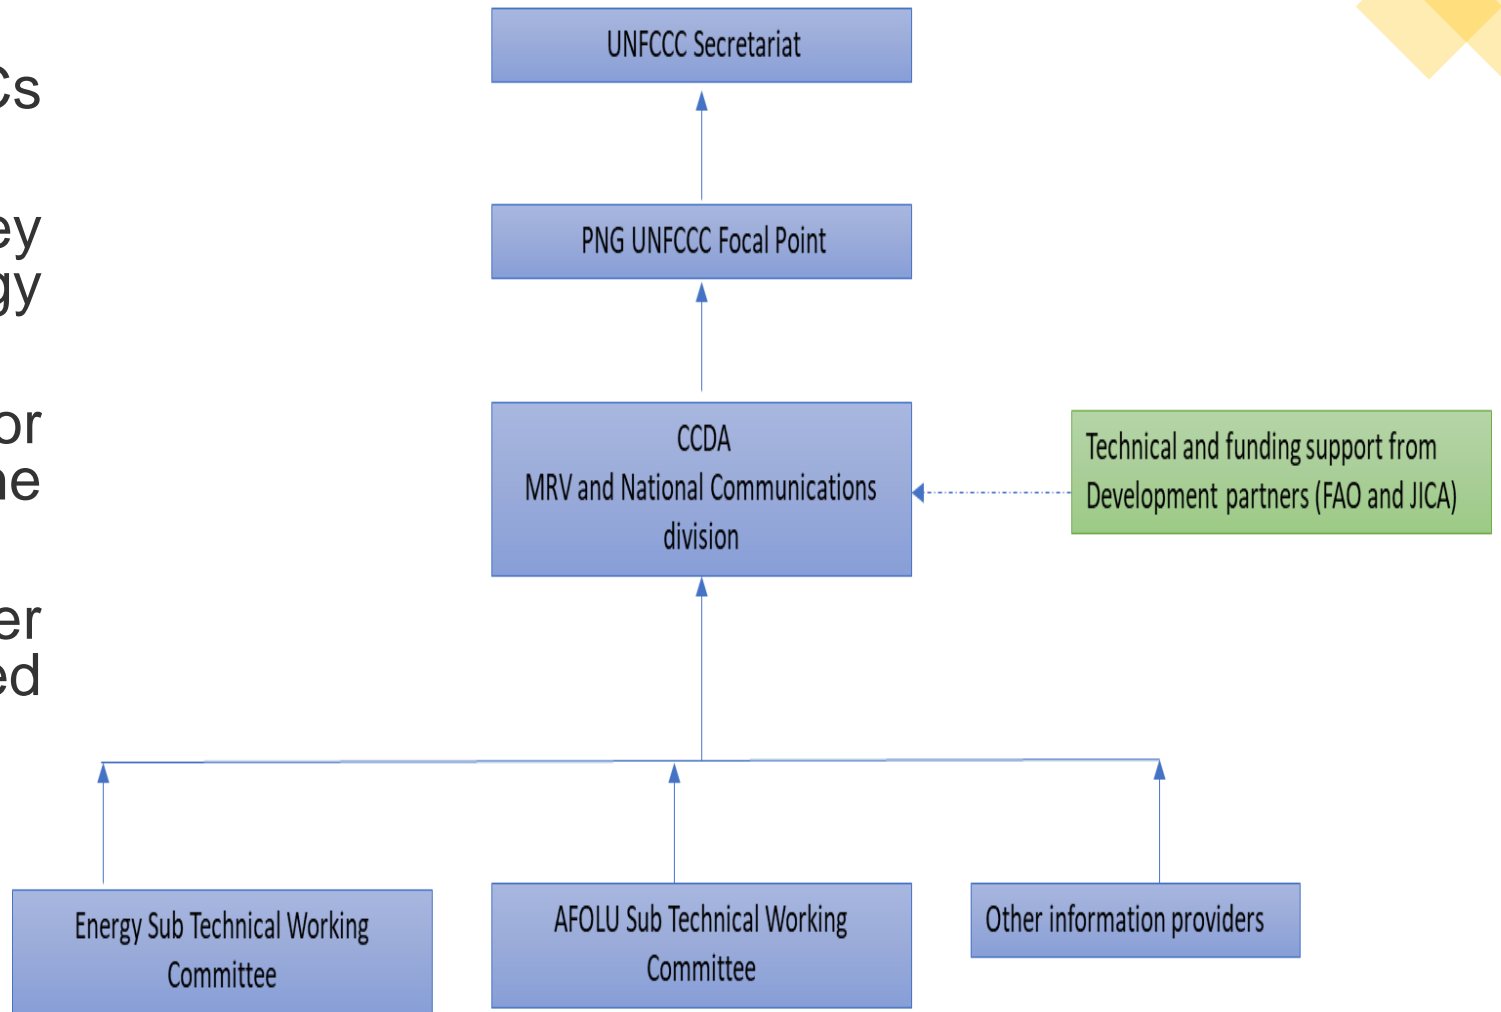

CCDA's Responsibilities

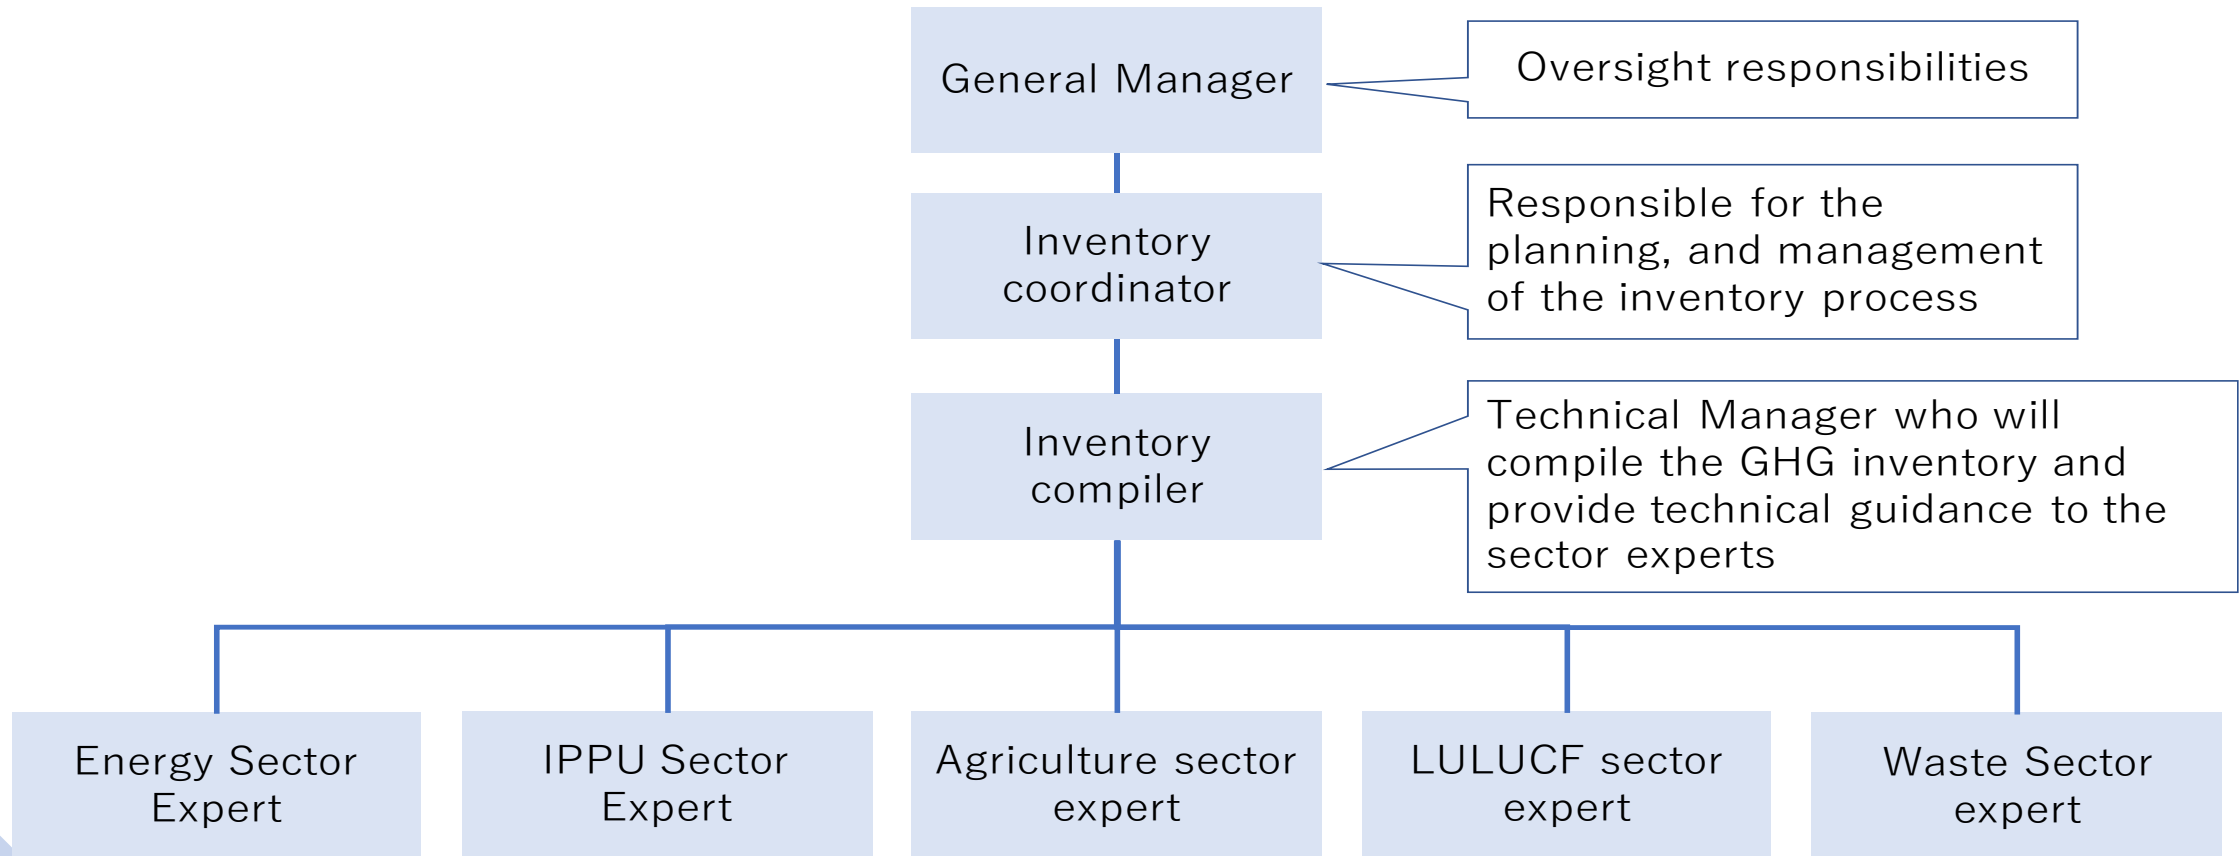

- Keep Sub-Technical Working Committees informed of progress and emerging issues;
- Compile and integrate all sections of the BUR and NC into a cohesive document;
- Develop and maintain an archiving system to ensure institutional memory and to fully and systematically document all the activity data and the methods used;
- Collect and maintain statistical records;
- Conduct an evaluation exercise to identify key lessons learned and areas for improvement; and
- Consider the results of the International Consultation and Analysis (ICA) process.

Sub-Technical Working Committees (STWCs)

- CCDA has established 2 STWCs (Energy and AFOLU)
- The STWCs consist of key stakeholders within the energy and AFOLU sectors in PNG
- The STWCs are responsible for providing technical inputs for the preparation of the BURs
- Other institutions from other sectors have also provided information to CCDA

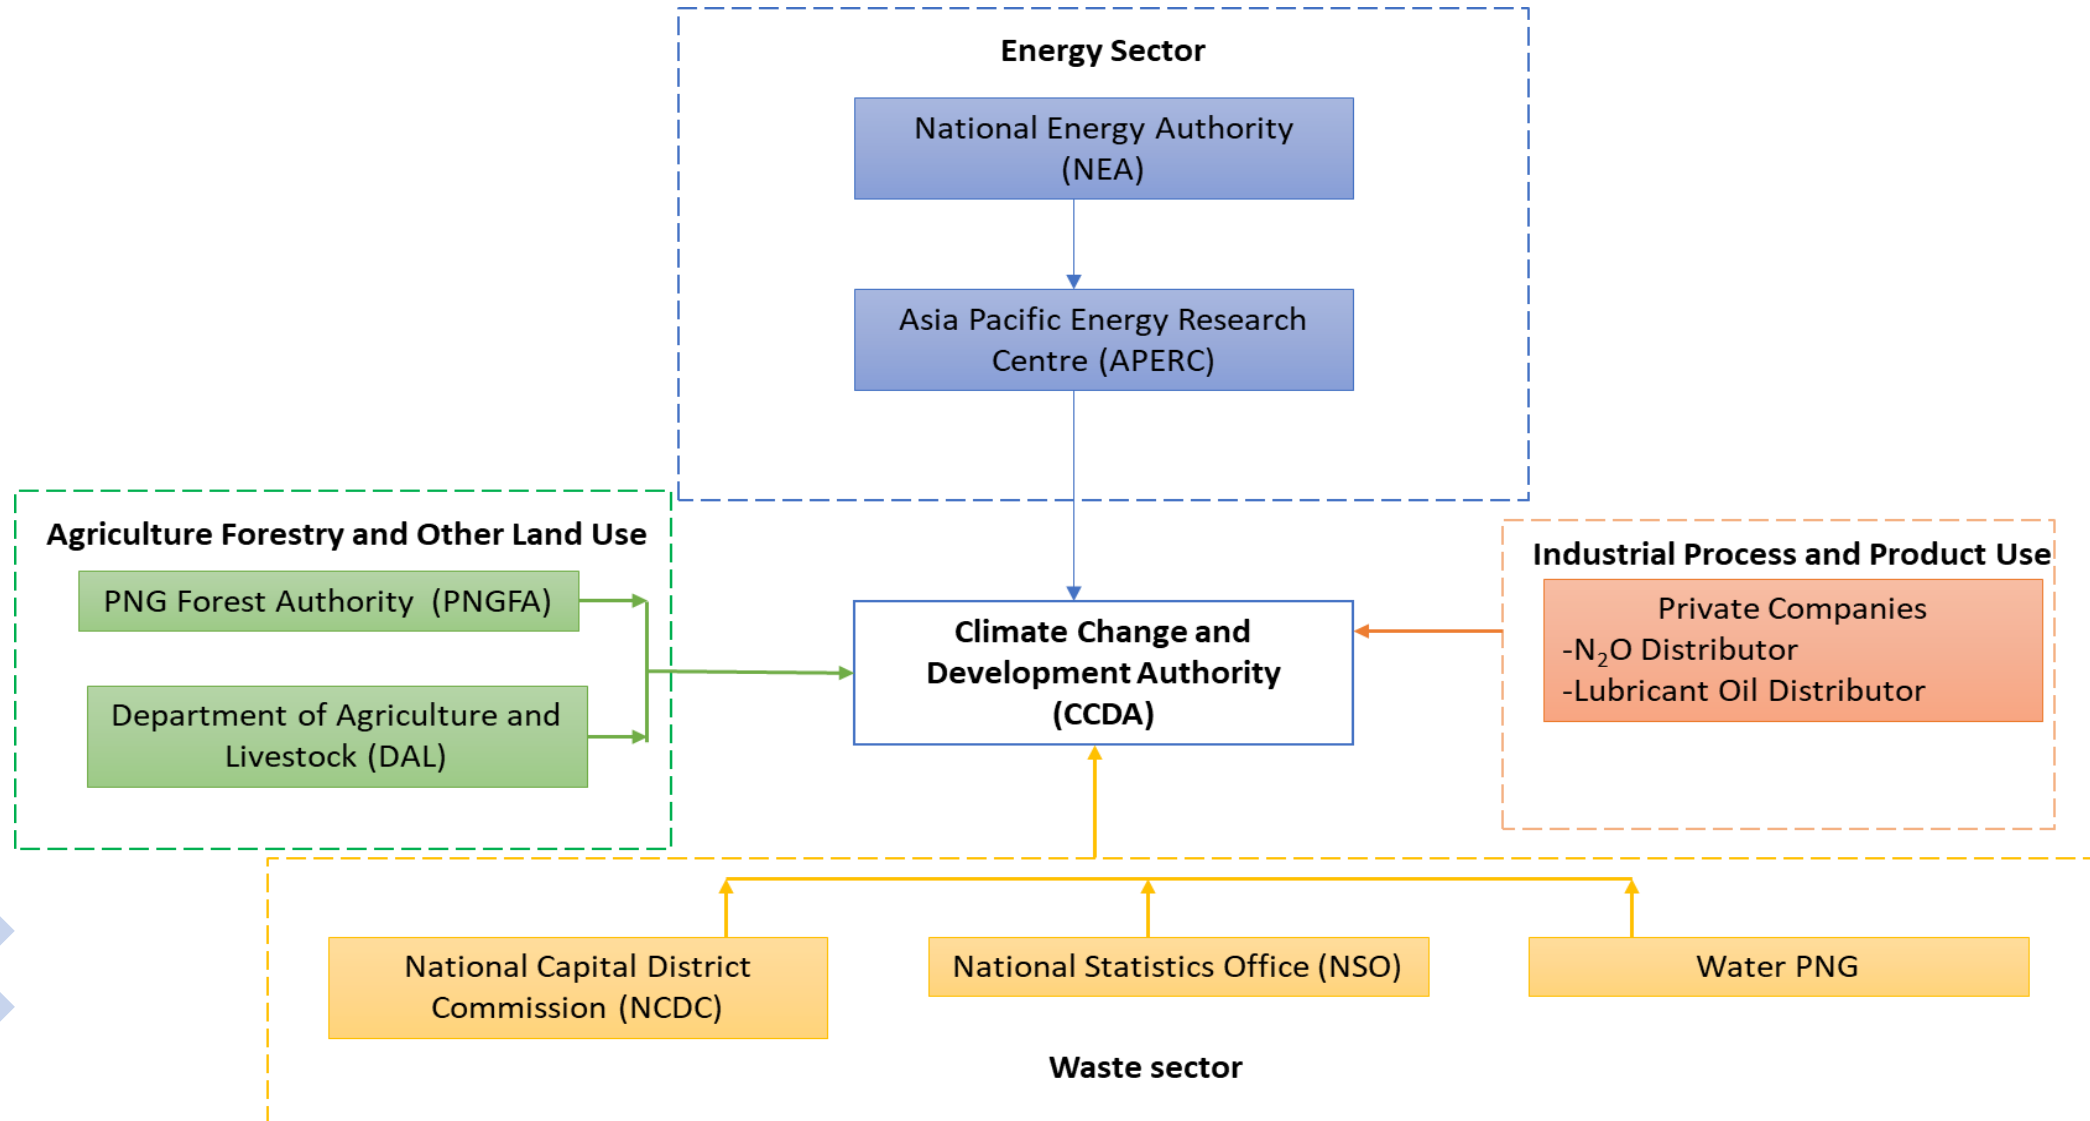

GHG Inventory team

The sector experts are responsible for planning the GHG inventory preparation process for their respective sectors. They are responsible for carrying out research, engaging stakeholders/data providers, collecting data, estimating emissions removals and drafting the inventory report for their respective sectors.

GHG Inventory Data-Sharing Arrangement

Areas of Improvement

- Identifying additional data providers to address gaps in the GHG Inventory
- Enhance institutional arrangement for reporting of:
 - ✓ Mitigation actions;
 - ✓ Adaptation actions;
 - ✓ Tracking of NDCs; and
 - ✓ Support needed and received

Thank you
