

Overview of the Modalities, Procedures and Guidelines (MPGs) for the Enhanced Transparency Framework (ETF) and its linkage to the MLP

July 2023

Takashi Morimoto

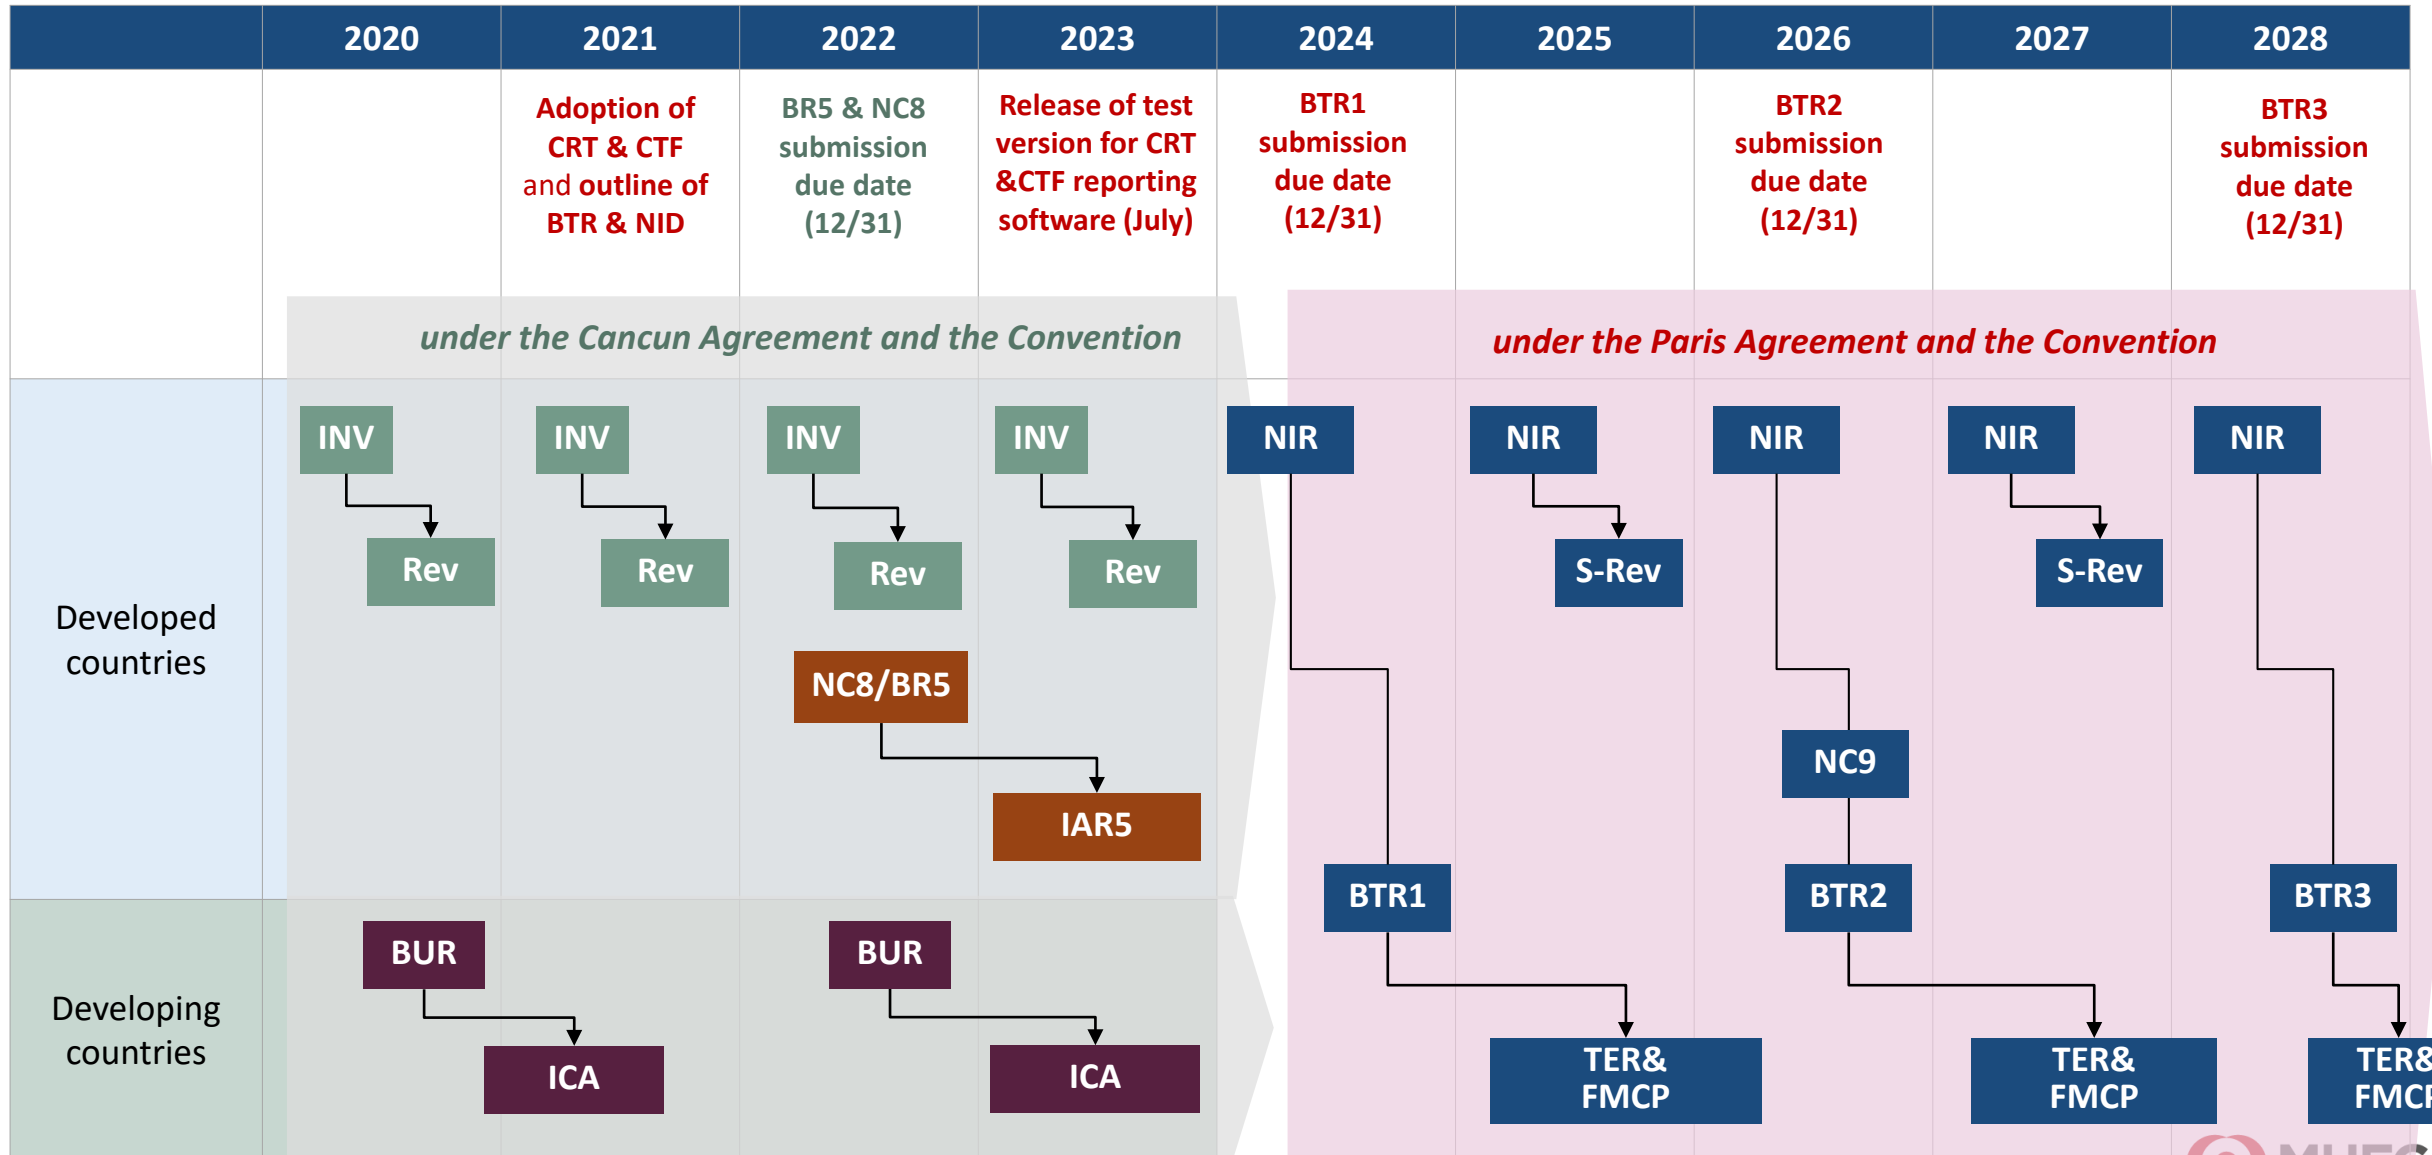

Chief Analyst,

Mitsubishi UFJ Research and Consulting Co., Ltd. (MURC) Japan

Transition to the ETF

We are here!

Overview of MPGs

✓ Parties shall use the MPGs (Decision 18/CMA.1, Annex) to prepare the BTRs.

Decision 18/CMA.1, Annex

I. Introduction

- ✓ Purpose, Guiding principles, Flexibility, etc.

II. National inventory report

- Reporting guidelines of **national GHG inventories**, including,
- ✓ Definitions
 - ✓ Methods (Methodologies, Key category analysis, QA/QC, etc.)
 - ✓ Metrics (AR5 100yr GWP)
 - ✓ Reporting guidance (Sector and gases, time series, etc.)

Focus!

III. Information necessary to track progress of NDCs under Article 4

- Reporting guidelines of **information necessary to track progress of NDCs**, including,
- ✓ Description of NDC
 - ✓ Tracking progress of NDC
 - ✓ Mitigation policies and measures
 - ✓ Projections

IV. Information related to climate change impacts and adaptation

Reporting guidance of **information on climate change impacts and adaptation**

V. Information on support provided and mobilized

Reporting guidelines of **financial, technology development and transfer and capacity-building support provided and mobilized**

VI. Information on support needed and received

Reporting guidelines of **financial, technology development and transfer and capacity-building support needed and received**

VII. Technical expert review

Modalities and procedures of **TER**

VIII. Facilitative, multilateral consideration of progress

Modalities and procedures of **FMCP**

Overview of MPGs Chapter III

Tracking progress in implementing and achieving NDCs

Chapter III: Tracking progress in implementing and achieving NDCs

A. National circumstances and institutional arrangements

B. Description of a Party's NDC

C. Information necessary to track progress of NDC

Focus!

D. Mitigation policies and measures, actions and plans

E. Summary of greenhouse gas emissions and removals

F. Projections of greenhouse gas emissions and removals

G. Other information

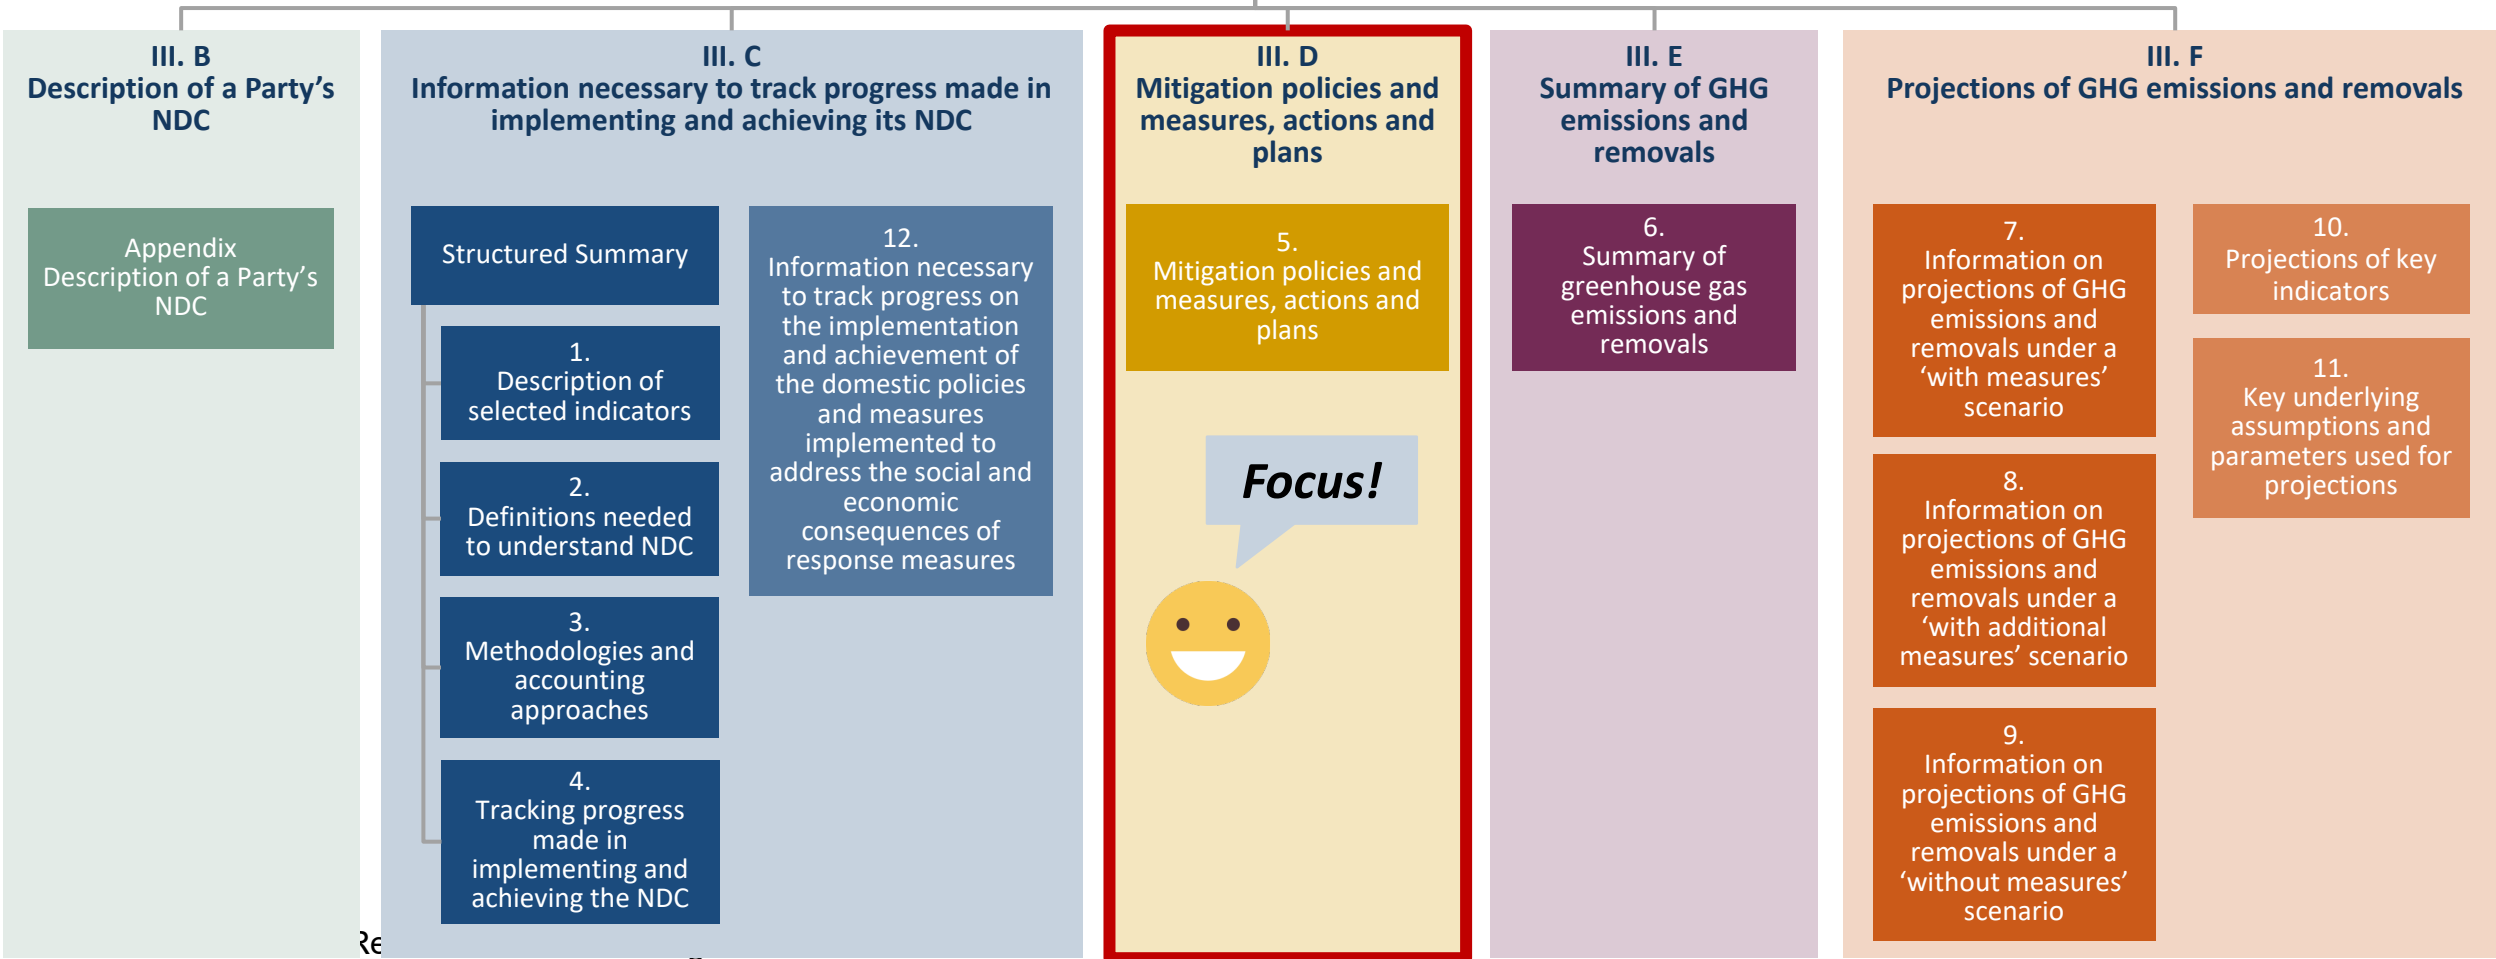

Reporting requirements of mitigation PaMs

Components	BTRs	Flexibility
<p>Mitigation policies and measures, actions and plans</p>	<ul style="list-style-type: none"> ✓ Provide the following information on its actions, policies and measures (PaMs), to the extent possible, in a tabular format: (Name, Description, Objectives, Type of instrument, Status, Sector(s) affected, Gases affected, Start year of implementation, Implementing entity or entities) ✓ <i>Provide the following information for each PaM reported:</i> <i>(Costs, Non-GHG mitigation benefits, How the mitigation actions interact with each other, as appropriate)</i> ✓ Provide, to the extent possible, estimates of expected and achieved GHG emissions reductions for PaMs ✓ Describe the methodologies and assumptions used to estimate the GHG emissions reductions or removals by each PaM ✓ Identify those PaMs that are no longer in place, and explain the reason ✓ Identify PaMs that influence GHG emissions from international transport ✓ Provide information about how its PaMs are modifying longer-term trends ✓ <i>Provide detailed information, to the extent possible, on the assessment of economic and social impacts of response measures.</i> 	<ul style="list-style-type: none"> ✓ <i>Provide estimates of expected and achieved GHG emissions reductions for PaMs</i> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>Note: Red Bold : shall Navy bold: should <i>Green italic : encouraged to</i> <i>Black italic : may</i></p> </div>

Structure of CTFs to track progress of NDCs

- ✓ The CTFs (Common Tabular Formats) for the reporting of the information on tracking progress of NDC were adopted at COP26.

Annex II CTFs for the information necessary to track progress made in implementing and achieving NDCs under Article 4 of the Paris Agreement

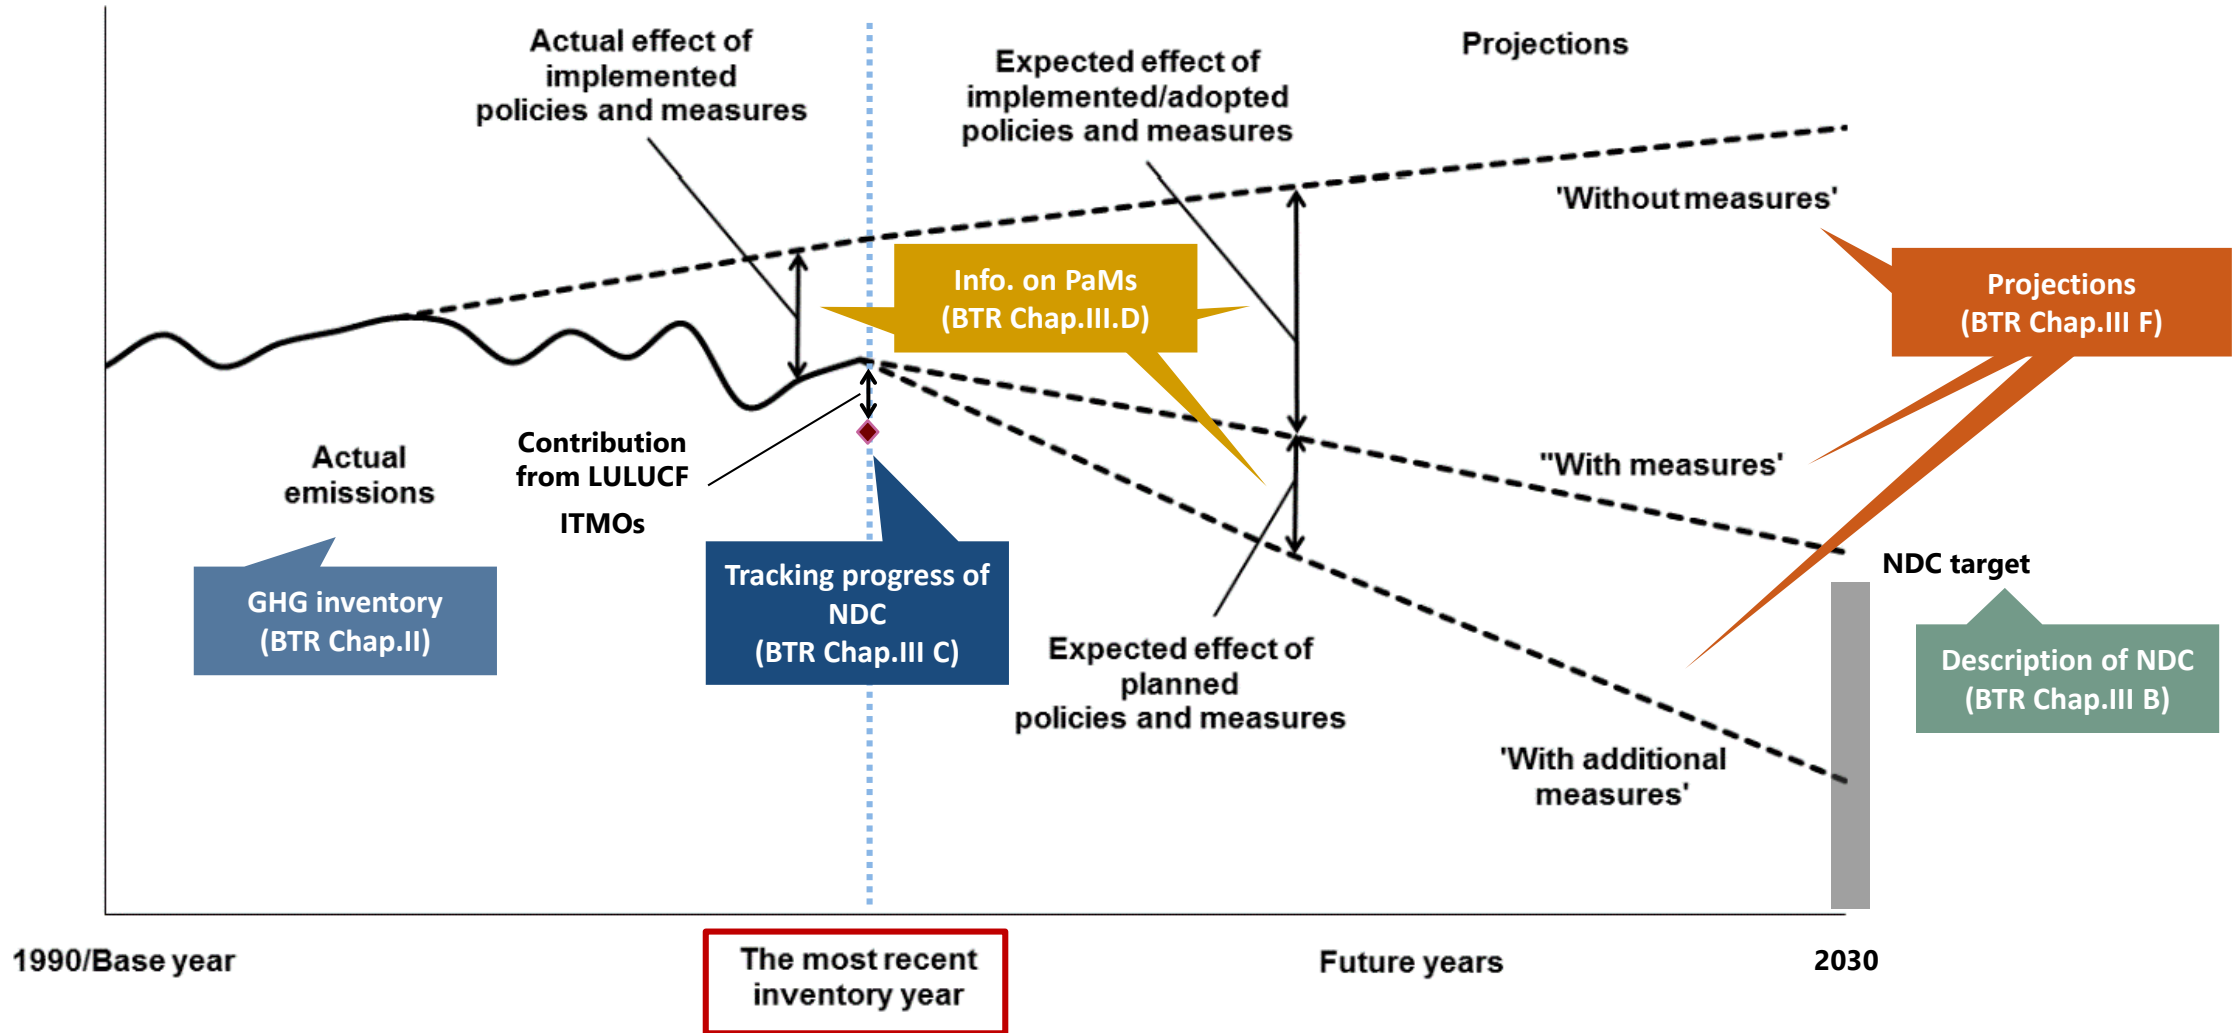

CTF Table 5 Mitigation policies and measures, actions and plans

- ✓ **Each Party shall provide the following information on PaMs;**
 - ✓ Name
 - ✓ Description
 - ✓ Objectives
 - ✓ Type of instrument
 - ✓ Status
 - ✓ Sector(s) affected
 - ✓ Gases affected
 - ✓ Start year of implementation
 - ✓ Implementing entity or entities
- ✓ **Each Party shall provide, to the extent possible, estimates of expected and achieved GHG emission reductions** for PaMs

CTF Table 5 Mitigation policies and measures, actions and plans

<i>Name^c</i>	<i>Description^{d,e,f}</i>	<i>Objectives</i>	<i>Type of instrument^g</i>	<i>Status^h</i>	<i>Sector(s) affectedⁱ</i>	<i>Gases affected</i>	<i>Start year of implementation</i>	<i>Implementing entity or entities</i>	<i>Estimates of GHG emission reductions (kt CO₂ eq)^{j,k}</i>	
									<i>Achieved</i>	<i>Expected</i>
<hr/>										

Relationship between GHG inventory, NDC, PaMs, and projections

Importance of tracking PaMs

Accurate tracking of PaMs can contribute to:

-  **1. improving the probability of achieving the NDC** through updating and enhancing existing PaMs based on their progress
-  **2. more evidence-based NDC development** by quantifying the emission reduction potential of PaMs
-  **3. appropriately reflecting emission reductions by PaMs in the GHG inventories** by utilizing data obtained through the PaM tracking process
