

Training Workshop for the Pacific Islands countries: Regional workshop on Enhanced Transparency Framework (ETF) and Modalities, Procedures and Guidelines (MPGs) under the Paris Agreement

Country Presentation: on the process to develop BUR/NC and future plans for BTR preparation

Kiribati

Kaaroti Henry & Tekimwau Otiawa

Reporting under the Convention (NatCom, BUR)

Current situation of preparation of NatCom and BUR:

BUR/TNC: already presented:

1. National Level
2. UNEP review

In process: KNEG Consultation Review Meeting
Cabinet Endorsement

(The submission of the BUR1 Final Report will be expected in November while TNC in October, 2023)

Reporting under the Paris Agreement (BTR)

Current situation of preparation of BTR:

Date of approval of project by GEF: November 2022

Current Activites	Status	Way-forward
Hiring of consultant	The TOR for consultant has been developed, the consultant hasn't hired.	Issue: inadequate national expert rely on International Consultant.
Data Gathering	These activities are freeze due to the delay of consultant recruitment. Planned to carry out in November	The data gathering will be made upon the submission of BUR/TNC
Inventory Update		
Training		
Stakeholders consultation		

Expected date for finalization: November 2023

....

Reporting under the Paris Agreement (BTR)

Main general challenges in Reporting and lessons learned from NC/BUR process:

- Unavailability of activity data and emission factors of some sectors
- Kiribati still does not have appropriate templates for data collection to feed into the software.
- Lack of commitment from external stakeholders and within the section.
- Lack of a centralized data collection
- lack of capacity for data quality controlled and assurance.

Experience and challenges with CTF (tracking of NDC and mitigation policies and measures, information on support needed/received) for reporting under the BTR rules:

Lack of capacity in energy and technology fields

Lack of funding to implement the NDC investment plan concept notes

Data management-scatter of data

Any content of the BTR and NID particularly challenging so far:

The proposal has been just submitted
