

Capacity Building Initiative for Transparency - Global Support Programme (CBIT-GSP): Asia Region

Welcome to Annual Meeting of Asia Transparency Network

22 January 2024

Agenda

Time	Activity
10'	Opening Session, Introduction and Photograph
15'	Key activities and outcomes of the CBIT-GSP Asia Transparency Network in 2023
10'	Mentimeter Survey Exercise and Result
20'	Interventions from the countries based on guiding questions
20'	Discussion on country's transparency actions in 2024, Mentimeter
15'	Presentation of the annual work plan for Asia
20'	Discussion and interventions from the countries on work plan
10'	Wrap-up and closing remarks, Mentimeter

Annual Activities in Number

- 9 Webinar/Workshops
- 7 In Country Support Activities
- 3 Quality Reviews

Regional Activities in Asia

Virtual/Physical events:

- Capacity need assessment Survey January 2023
- Kick-off Meeting: Initiating the Global Capacity-Building Initiative for Transparency 22 February 2023
- Training workshop on transitioning to the ETF and tracking of progress in implementing and achieving NDCs for Asia
 Region 8 10 March 2023
- Webinar on GEF Support for BTR Financing and Access Modalities (for Asia and Pacific) 2 May 2023
- Transition to Enhanced Transparency Framework: Issues and Challenges from Malaysia's Perspective 18 May 2023
- Institutional Arrangements for Transparency: Best Practices and Lessons Learned from Singapore 25 May 2023
- Benefits and Outcomes of Capacity Building Initiative for Transparency (CBIT) Project: Lessons Learned from
 Bangladesh 22 June 2023
- Introductory Webinar on Tracking Progress of the Mitigation Commitments of Nationally Determined Contributions
 (NDCs) 16 August 2023
- Introduction to the Climate Transparency Platform for the Asia Transparency Network 24 August 2023
- Asia Regional Network Workshop on Tracking Progress of the Mitigation Commitments of NDCs 11-13 September 2023

National Activities in Asia

In-country support:

- Mongolia: Technical analysis of Mongolia's Second BUR and NIR May June 2023
- India: Technical review of GHG inventory chapter of TNC March April 2023
- Nepal: Enhancing National Greenhouse Gas Inventory Management System for Nepal August 2023
- Bhutan: Transparency and Reporting under the PA: A discussion on ETFs, MPGs, CRT and CTF Tables October 2023
- Sri Lanka: Transparency and Reporting under the PA: A discussion on ETFs, MPGs, CRT and CTF Tables October 2023
- Bhutan: Technical support to facilitate the International Consultation and Analysis (ICA) review process of Bhutan's first
 BUR December 2023

ACs: 2023
It is responsible for hosting the Bangladesh

Climate Change MRV system, which focuses or

Climate Change MRV system, which focuses on collecting, sharing, archiving, and fostering institutional arrangements related to GHG emission, adaptation, mitigation, and finance data among the relevant government agencies.

The MRV system of Bangladesh clearly

defines the roles and responsibilities of the relevant actors. The MRV system involves

relevant accors. The Mirk system involves several key actors, including general users, data providers, MRV coordinators, and system administrators. The MRV coordinator will regularly review

the data and results of the MRV system to the data and results of the MRV system to ensure the proper implementation of QA/QC protocols. The MRV administrator will have full control and authority to approve, edit, and delete user registrations and database entries. Besides, each module will have at least one

MRV coordinator, MRV coordinator shall MRV coordinator. MRV coordinator shall validate and verify the activity data entered in the online MRV system as well as approve or reject the data. The MRV system allows general users or the

public to easily browse and access a wide range of resources, including data, graphs orts, training materials, and more. Simply

Good Practice Series on Transparency

Climate Change MRV System in Bangladesh

Ine Pais Agreement mandates countries to establish a robust measuring, reporting, and verification (MRV) system to track climate change actions and policies. Bangladesh has established an integrated platform to develop a verifiable greenhouse gas inventory and a sustainable adaptation, mitigation, and finance tracking system. The platform is hosted by the Department of Environment (DoE).

Challenges addressed

Chailenges addressed
The Bangladesh MRV platform aims to support
the preparation of national GHG inventory for
Agriculture, Forestry and Other Land Use
(AFOLU), Energy, Industrial Processes and
Product Use (IPPU), and Waste sectors, it achieves this by providing up-to-date emission activety this by providing up-to-date emission activity, adaptation, militgation, and finance data. The platform also facilitates data sharing, analysis, and interpretation by bringing together all relevant stakeholders on a single platform. Additionally, it offers a permanent archiving system for easy access to information.

Approach
The MRV platform was developed as part of the project "Strengthening capacity for monitoring environmental emissions under the Paris Agreement in Bangladesh." It received financial support from the Global Environment Facility (GEF) and technical support from the Food and Agriculture Organization of the United Nations (FAO). The DoE serves as the technical arm to the Ministry of Environment Forest and Climate Change (MoEFCC).

Modalities, procedures and guidelines for the transparency framework for action and support referred to in

- The guiding principles of these modalities, procedures and guidelines (MPGs) are
- » Building on and enhancing the transparency arrangements under the Convention, recognizing the special circumstances of the least developed countries (LDCs) and small island developing States (SIDS), and implementing the transparency framework in a facilitative, non-intrusive, non-punitive manner, respecting national sovereignty and avoiding placing undue burden on Parties

Article 13 of the Paris Agreement

- » The importance of facilitating improved reporting and transparency over time:
- » Providing **flexibility** to those developing country Parties that need it in the light of their capacities,
- » Promoting transparency, accuracy, completeness, consistency and comparability: » Avoiding duplication of work and **undue burden** on Parties and the secretariat;
- » Ensuring that Parties maintain at least the frequency and quality of reporting in accordance with their respective obligations under the Convention;
- » Ensuring that double counting is avoided;
- The developing country Party shall clearly indicate the provision to which flexibility is applied, concisely clarify capacity constraints, noting that some constraints may be relevant to several
- and provide self-determined estimated time frames for improvements in relation to those capacity constraints
- When a developing country Party applies flexibility provided for in these MPGs, the technical expert review teams shall not review the Party's determination to apply such flexibility or whether the Party possesses the capacity to implement that specific provision without flexibility.

Summary of Paragraphs

- 17 58 National GHG Inventory Report
- 59 103 Track progress made in implementing and achieving Nationally Determined Contributions (NDCs)
- 104 117 Climate Change Impacts and Adaptation
- 118 129 Financial, Technology development and transfer and Capacity-building Support provided and 130 - 145 Financial, Technology development and transfer and Capacity-building Support needed and received
- 146 188 Technical Expert Review (TER)
- 189 199 Facilitative, Multilateral Consideration of Progress (FMCP)

Interventions from the countries

Guiding questions:

- 1. How do you evaluate the Asia Transparency Network activities and the support provided in 2023 with regard to your country's readiness for the BTR? What worked well? What did not work well?
- 2. What are the areas of improvement for the Asia Transparency Network support activities in 2024?
