

# Panel: Country experiences of implementing NIS: what works and what does not

1. Could you describe institutional arrangements you have implemented for your NIS?
2. How important is it for you existing formal institutional arrangements for data collection in order to prepare your country's inventory?
3. In terms of forming institutional arrangements to produce the next BTR, what were the main challenges you encountered in your country. Was it helpful previous BUR experience in preparing your BTR?
4. Does your country continue to rely on external consultants to prepare the national GHG inventory, or building internal capacities within the Government?
5. Which sectors of your country's national GHG inventory have been more difficult to estimate? Why?
