Panel: Innovative experiences from country inventory teams (including local training activities and inventory awareness and dissemination examples)

1. Are you considering using software to automate the preparation of some parts of your inventory (charts, for example)?

2. What quality control/quality control activities are the inventory team developing in your country? Are you engaging external stakeholders?

3. What are your country's priorities for training the inventory team?

4. What other uses of the national inventory have you found in your country besides reporting to the UNFCCC?

5. Have you considered including Artificial Intelligence (AI) tools for the preparation of the national GHG inventory?
