

Presentation: Maldives current institutional arrangements for transparency: gaps, good practices and opportunities for improvement

Institutional Arrangement for GHG inventory compilation

Barriers For GHG Inventory Compilation

Aspect	Barriers and Constraints
Data availability and quality	<ul style="list-style-type: none">• Lack of institutional arrangements for data collection and data sharing.• Lack of local emission factors in energy, waste and transport sector;• Inconsistent data formats from the same sources and do not provide information for analysis;• Lack of proper methods in data acquisition, analysis and management• Lack of means for data quality control• Reluctance by the private sector in provision of their data as it is collected on a commercial basis.• Lack of the necessary infrastructure for collection of data such as atmospheric and oceanic data, coastal and geomorphological changes etc.
Institutional capacity and human resources	<ul style="list-style-type: none">• Shortage of skilled and professional staff in various institutions among the stakeholders• Insufficient information and technical knowhow of climate change mainstreaming into planning• Weak intersectoral coordination.• Frequent staff turnover at reporting agency as well as stakeholder agencies• Frequent changes to institutions (mostly occurs when government changes) or lapping mandates among institutions
