Climate Change Secretariat

Open discussion

1. Has a mapping exercise been conducted and successfully concluded to understand the new requirements under the ETF and identify the gaps?
2. What is the current status and timeline with regard to the preparation of the BTR?
3. Do you have a BTR coordination team? Is there a coordination between various stakeholders? How does it work?
4. Is there a functioning data management system (collecting, analyzing, reporting) in place?
5. Is there an implementation plan and a legal framework to support the institutional arrangements? Is sufficient financial and human resources allocated?
6. What are the capacity-building needs? Do you have information on the available support opportunities at national, regional and global level? Are there challenges in accessing these opportunities?

Thank you for your attention
