
Overview of the key components of robust and sustainable institutional arrangements to support the implementation of the ETF

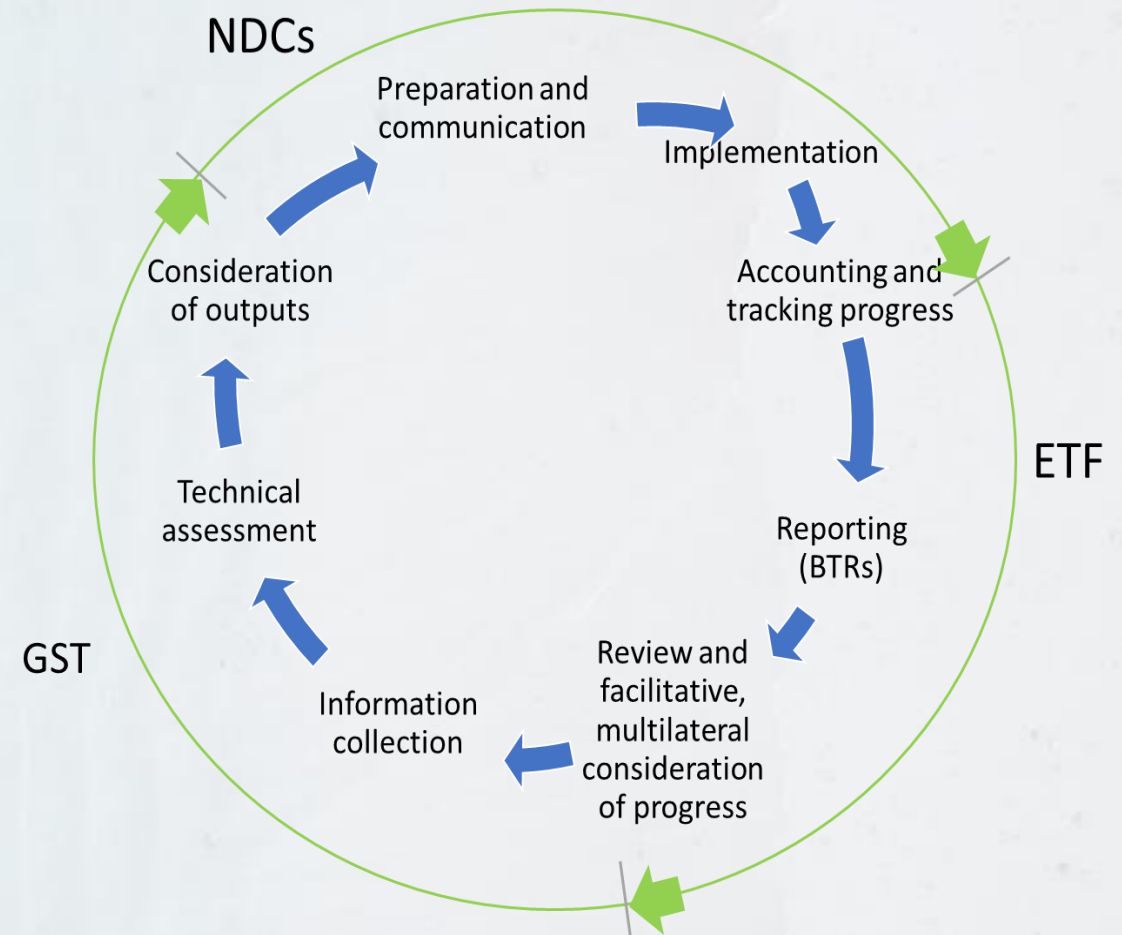

United Nations
Climate Change Secretariat

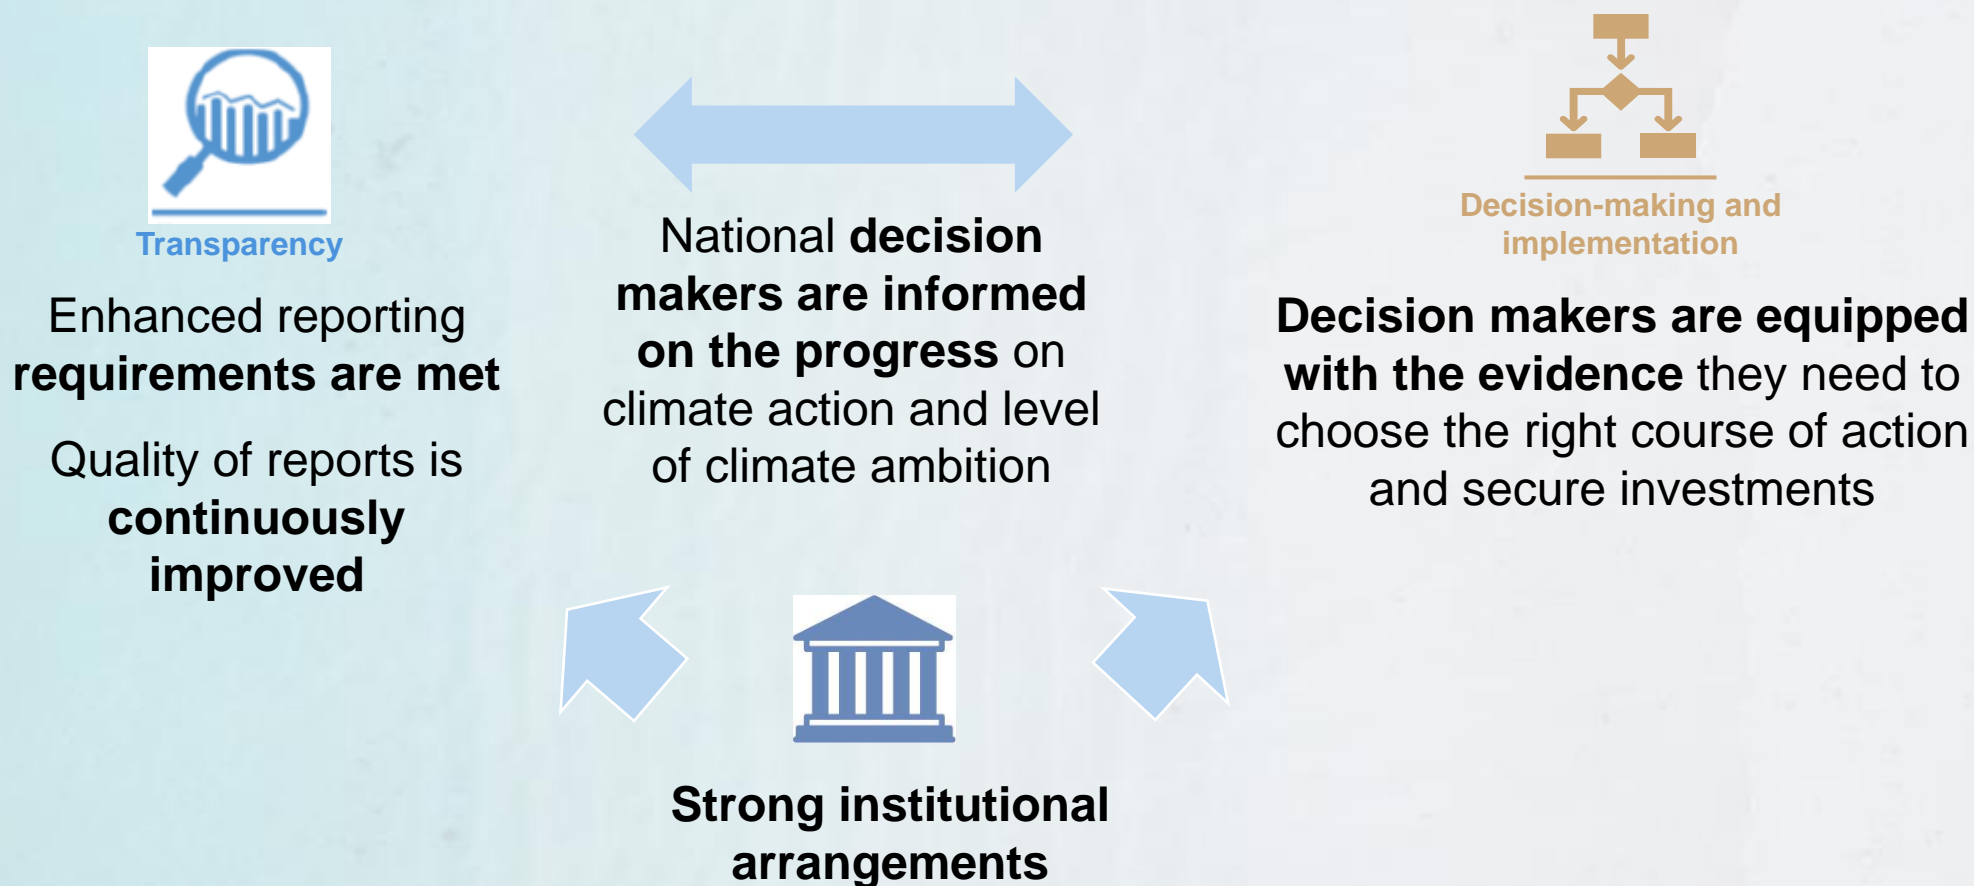

The adoption of the Paris Agreement and the transition from the existing MRV arrangements to the ETF will:

- ✓ Change in how governments respond to the new obligations, including preparation of:
 - **Successive NDCs every 5 years;**
 - **BTRs every 2 years;**
 - **GST every 5 years;**
- ✓ Enhanced scope and depth of climate reporting for developing countries.
- ✓ Necessitate a continuous process of improvement, collection, analysis, compilation and reporting/review of data.

Recurring processes under the Paris Agreement

- Strong institutional arrangements are vital to enabling countries to provide a reliable, consistent and continuous flow of data and information

Timely and sustainable international reporting

Informing policies, plans, strategies and programs

Political buy-in

Improved access to support

Increased awareness and engagement

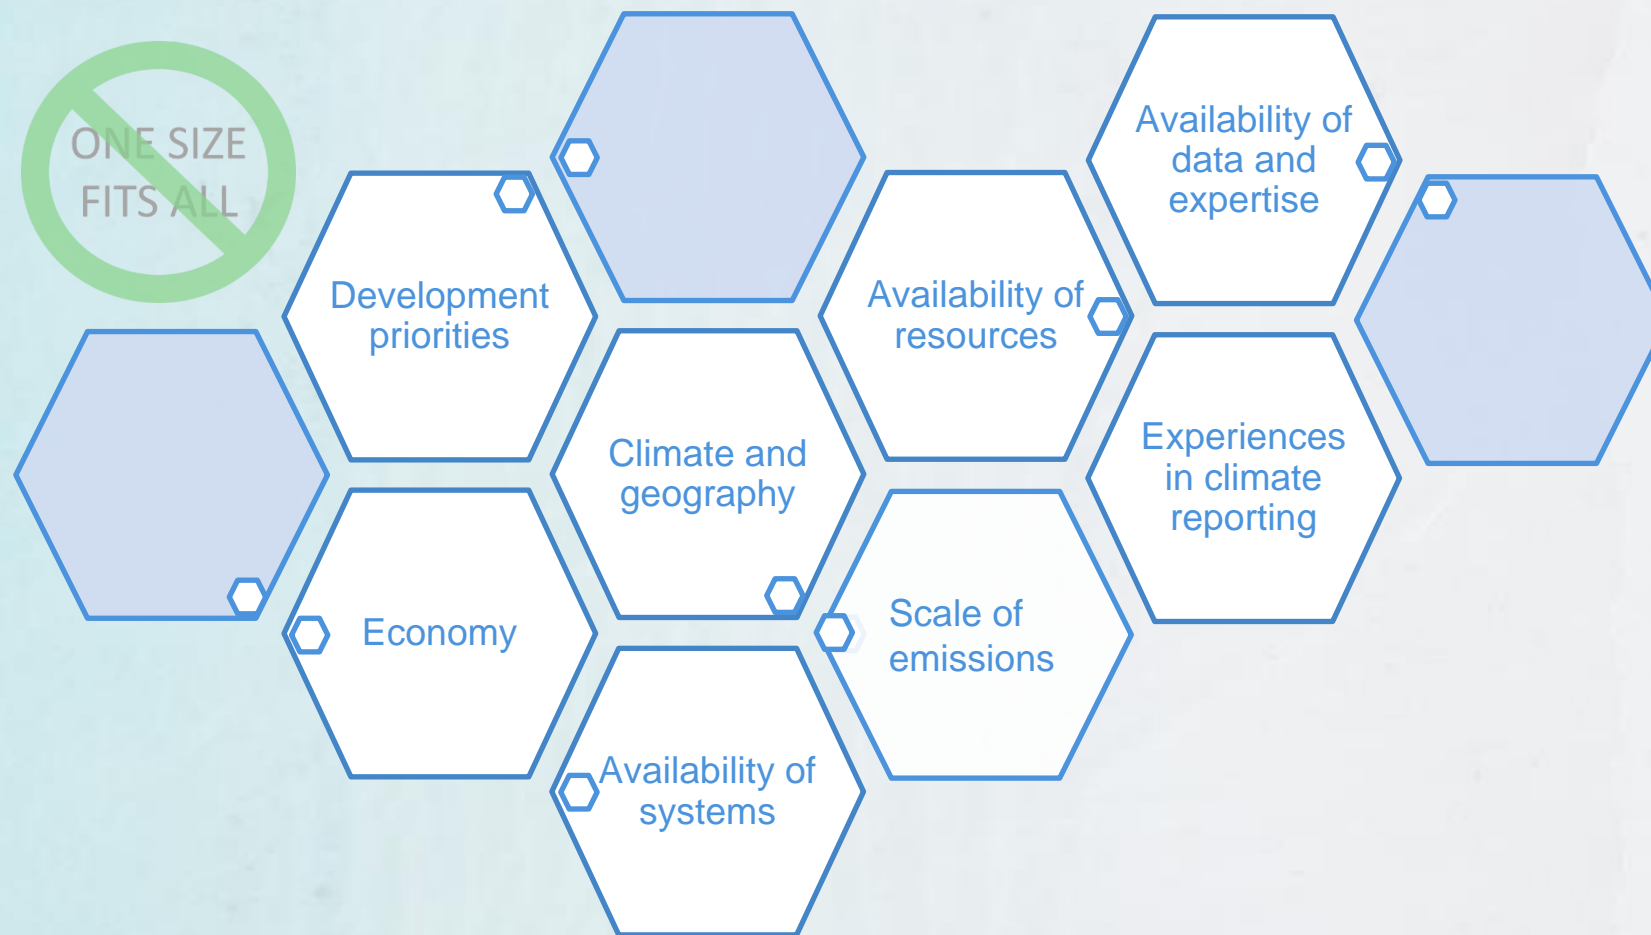

National capacity-building and expertise

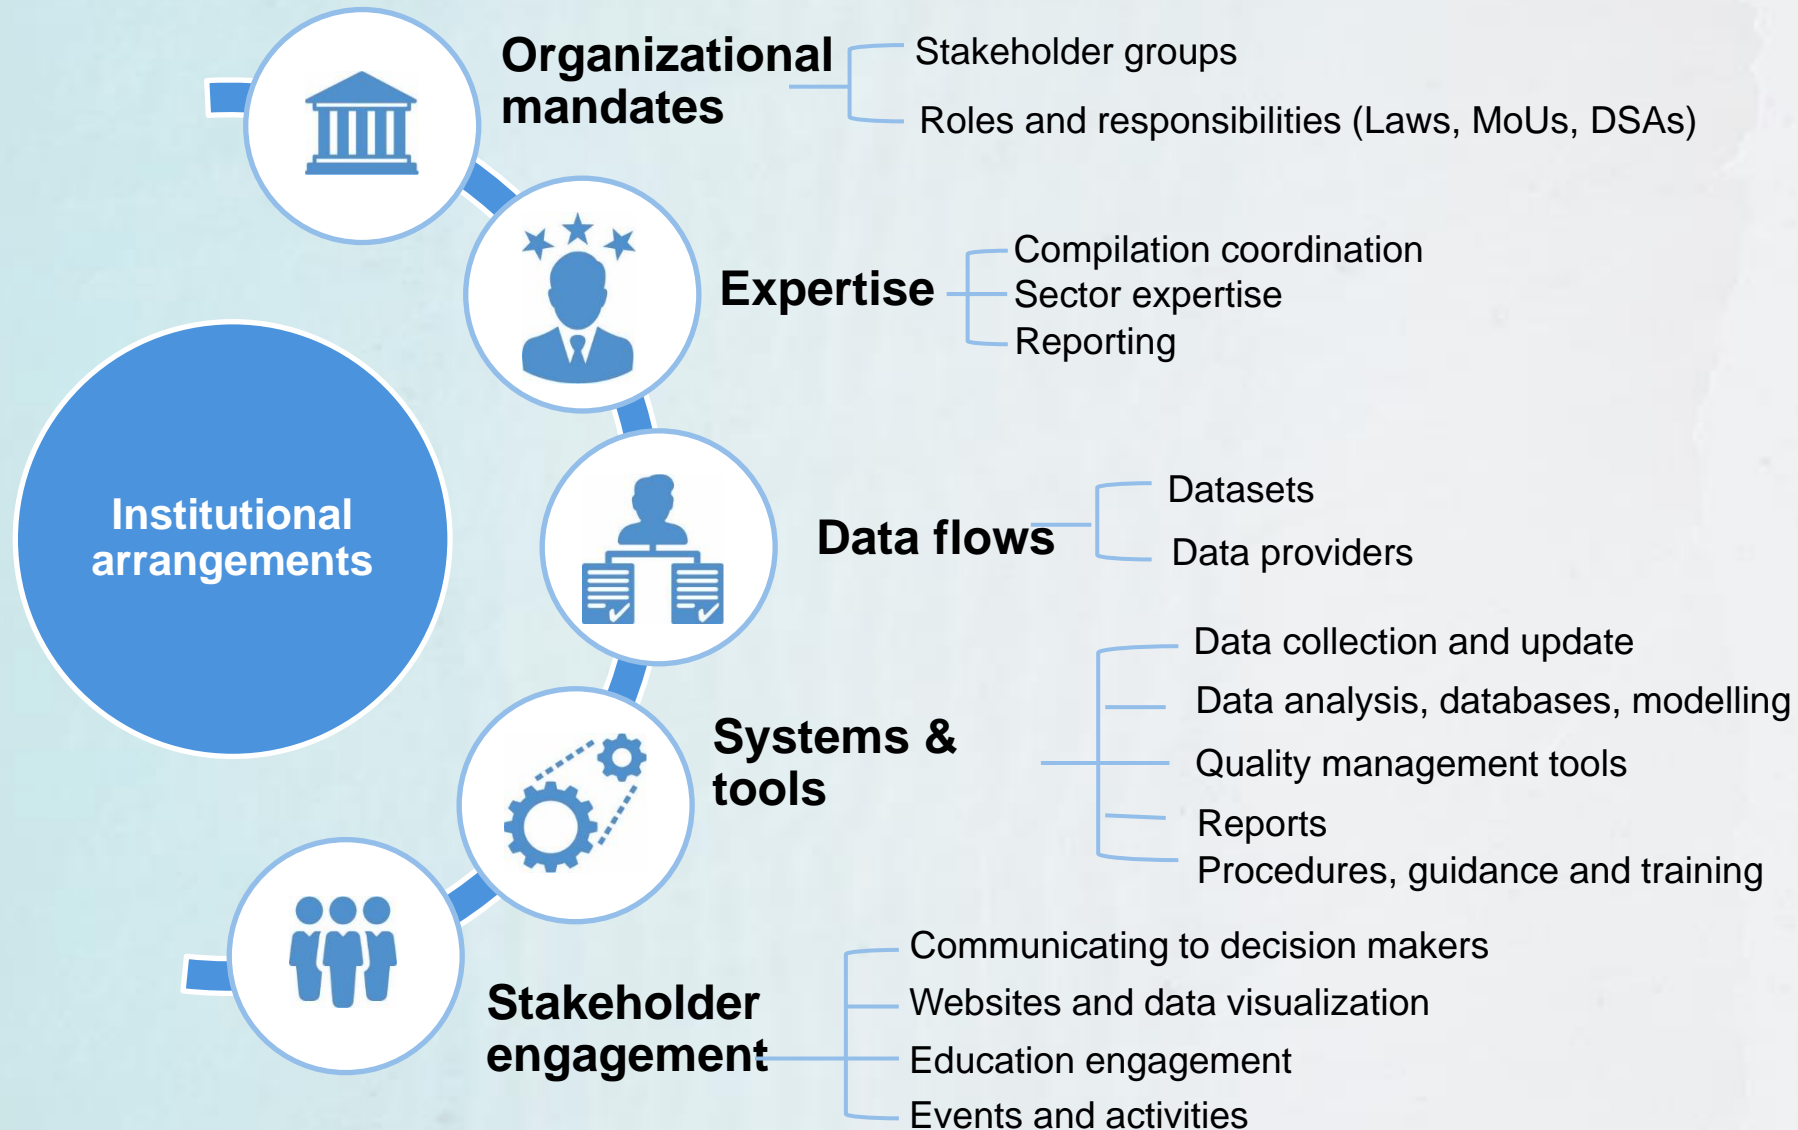

Defining institutional arrangements

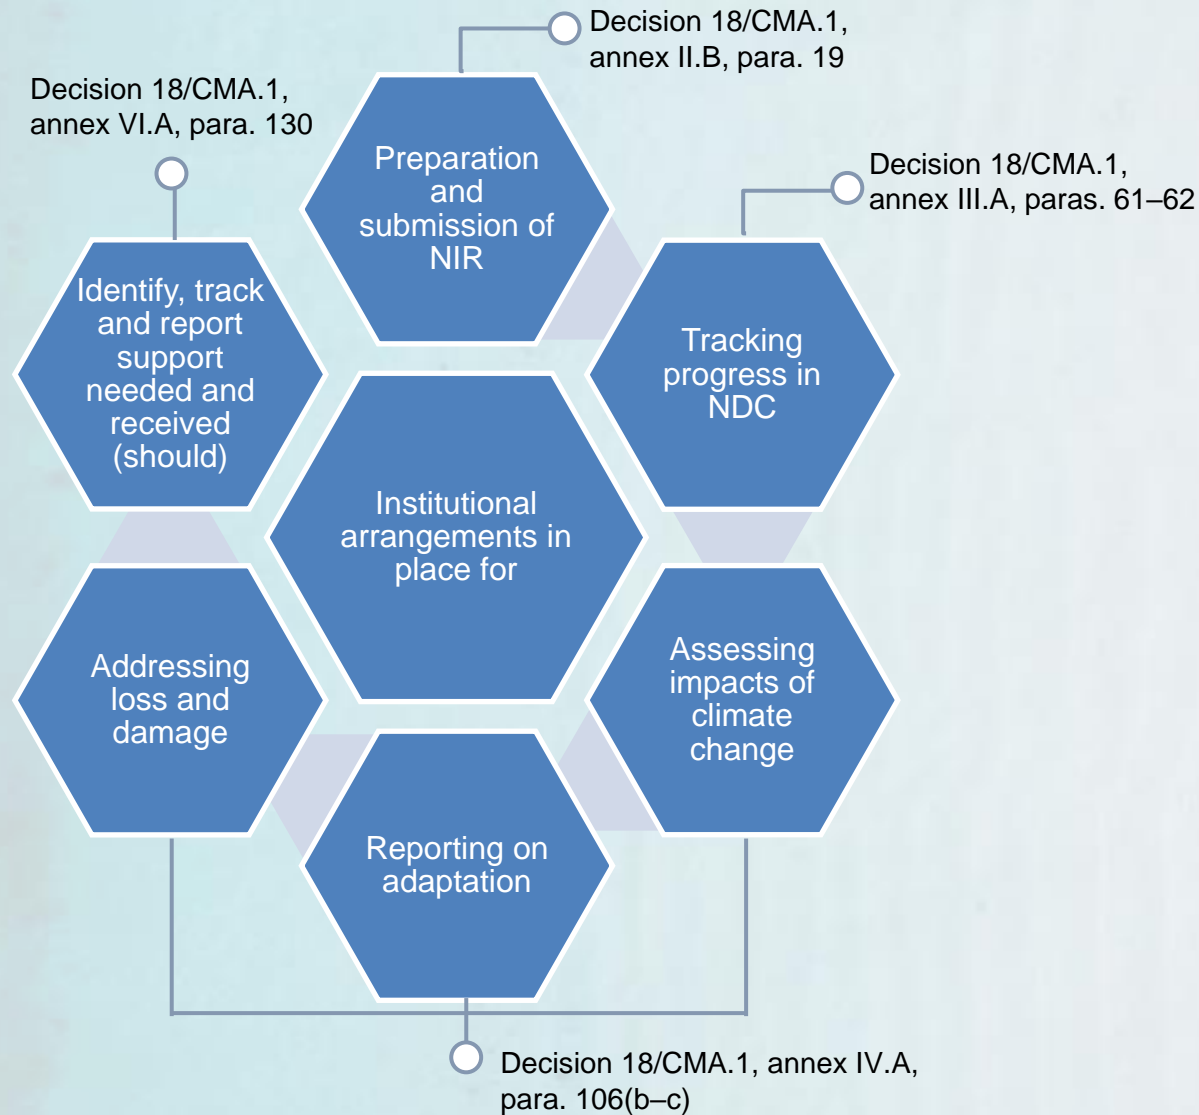

There is **no one-size-fits-all** model for institutional arrangements.

Need to be designed and **tailored to national circumstances.**

- Important to show how a range of stakeholders come together and work together across transparency themes (organizational charts)
- Demonstrate **what efforts are being made to enhance** the sustainability of institutional arrangements
- Demonstrate **how institutional arrangements are embedded in or interact with core national strategy development and implementation** functions as well as other environmental goals and the SDGs

Relevant provisions in the MPGs

➤ Each chapter includes section on national circumstances and institutional arrangements

Chapter II. National inventory report of anthropogenic emissions by sources and removals by sinks of GHG

- Each Party **should** implement and maintain national inventory arrangements.... national inventory arrangements can vary by Party depending on their national circumstances, and change over time.
- Each Party **shall** report on the following functions related to inventory planning, preparation and management:
 - (a) Its national entity or national focal point with overall responsibility for the national inventory;
 - (b) Its inventory preparation process, including division of specific responsibilities of institutions participating in the inventory preparation...
 - (c) Its archiving of all information for the reported time series, including all disaggregated emission factors and activity data, all documentation about generating and aggregating data, including quality assurance/quality control (QA/QC), review results and planned inventory improvements;
 - (d) Its processes for the official consideration and approval of the inventory.

III. Information necessary to track progress made in implementing and achieving nationally determined contributions under Article 4 of the Paris Agreement

- Each Party **shall** describe its national circumstances relevant to progress made in implementing and achieving its NDC under Article 4 of the Paris Agreement, including: (a) Government structure; (b) Population profile; (c) Geographical profile; (d) Economic profile; (e) Climate profile; (f) Sector details.
- Each Party **shall** provide information on how its national circumstances affect GHG emissions and removals over time
- Each Party **shall** provide information on the institutional arrangements in place to track progress made in implementing and achieving its NDC under Article 4, including those used for tracking internationally transferred mitigation outcomes, if applicable, along with any changes in institutional arrangements since its most recent biennial transparency report.
- Each Party **shall** provide information on legal, institutional, administrative and procedural arrangements for domestic implementation, monitoring, reporting, archiving of information and stakeholder engagement related to the implementation and achievement of its NDC under Article 4.
- In reporting the information referred to in paragraphs above, a Party **may** reference previously reported information.

IV. Information related to climate change impacts and adaptation under Article 7 of the Paris Agreement

- Each Party **should** provide the following information, as appropriate:
 - (a) National circumstances relevant to its adaptation actions, including biogeophysical characteristics, demographics, economy, infrastructure and information on adaptive capacity;
 - (b) Institutional arrangements and governance, including for assessing impacts, addressing climate change at the sectoral level, decision-making, planning, coordination, addressing cross-cutting issues, adjusting priorities and activities, consultation, participation, implementation, data governance, monitoring and evaluation, and reporting;
 - (c) Legal and policy frameworks and regulations.

VI. Information on financial, technology development and transfer and capacity-building support needed and received under Articles 9–11 of the Paris Agreement

- Developing country Parties **should** provide information on:
 - (a) A description of the systems and processes used to identify, track and report support needed and received, including a description of the challenges and limitations;
 - (b) Information on country priorities and strategies and on any aspects of the Party's NDC under Article 4 of the Paris Agreement that need support.

Phase 1: Scoping

- Clarify the scope and objectives
- Form a picture of the existing national system elements

Phase 2: Identifying key stakeholders, organizational mandates

- Find a champion
- Establish high-level coordination
- Map the proposed arrangements

Phase 3: Developing systems, processes, agreements to maintain data flows

- Develop an implementation plan
- Develop the legal framework
- Put in place structures for long-term success

Phase 4: Reviewing and improving

- Allow for the evolution of arrangements, systems and processes
