

Welcome!

Day 3

**Fast-tracking preparation of the
first BTR of Grenada**

Match the Acronym!

- Established under the Paris Agreement to ensure transparency in reporting climate actions and support.
- National commitments to reduce emissions and adapt to climate change impacts.
- Submitted jointly with BTR and covers a country's greenhouse gas emissions and removals.
- "the reporting vehicle of the ETF
- Rules for ensuring transparency, accuracy, and consistency in climate reporting.

Match the Acronym!

- “Tables used for reporting greenhouse gas emissions and removals.
- Annex tables for reporting progress of implementing NDC and support
- what developing countries can apply in light of their capacity constraints

Fast-tracking preparation of the first BTR of Grenada

Preparation of Chapter V: Information on financial, technology development and transfer and capacity- building (FTC) support needed and received

February 18 – 21, 2025,

Saint Georges, Grenada

Brittany Meighan Rancharan
CBIT-GSP Regional Coordinator, Anglophone Caribbean
UNEP Copenhagen Climate Centre
brittany.meighan@un.org

Session Outline

- Reporting provisions on support needed and received under the current MRV arrangements
- Reporting provisions on support needed and received under the new ETF, following the modalities, procedures and guidelines (MPGs) adopted by decision 18/CMA.1
- Common tabular formats (CTFs) for reporting on support needed and received in BTRs as adopted by decision 5/CMA.3 in Glasgow

Preparation of Chapter V- Information on FTC Support Needed and Received

BTR MPGs: Decision 18/CMA.1, Annex: Ch

A. National circumstances, institutional arrangements and country-driven strategies

B. Underlying assumptions, definitions and methodologies

C. Financial support needed by developing country Parties

D. Financial support received by developing country Parties

E. Technology development and transfer support needed by developing country Parties

F. Technology development and transfer support received by developing country Parties

G. Capacity-building support needed by developing country Parties

H. Capacity-building support received by developing country Parties

I. Support needed and received by developing country Parties for the implementation of Article 13 of the Paris Agreement and transparency-related activities

Decision 18/CMA.1, Annex: Chapter VI of the MPGs

Textual Format	Textual and Tabular Format
A. National circumstances, institutional arrangements and country-driven strategies	C. Financial support needed
B. Underlying assumptions, definitions and methodologies	D. Financial Support Received
	E. Technology development and transfer support needed
	F. Technology development and transfer support received
	G. Capacity-building support needed
	H. Capacity-building support received
	I. Support needed and received for implementing Article 13

A. National circumstances, institutional arrangements and country-driven strategies

Chapter Objectives

- Sets the context for information provided in the BTR.
- Describes systems and tools to track and report.
- Linkage between the support needed and Party's climate priorities (Example-NDC)
- Challenges and barriers faced during the reporting on support needed and received.

130. Developing country Parties should provide information on national circumstances and institutional arrangements relevant to reporting on support needed and received, including:

(a) A description of the systems and processes used to identify, track and report support needed and received, including a description of the challenges and limitations;

(b) Information on country priorities and strategies and on any aspects of the Party's NDC under Article 4 of the Paris Agreement that need support.

B. Underlying assumptions, definitions and methodologies

131. Developing country Parties **should** describe the underlying assumptions, definitions and methodologies, including, **as applicable**, those used to:

- (a) Convert domestic **currency** into USD;
- (b) Estimate the amount of support **needed**;
- (c) Determine the reporting year or **time frame**;
- (d) Identify support as coming from specific **sources**;
- (e) Determine support as **committed, received or needed**;
- (f) Identify and report the **status** of the supported activity (planned, ongoing or completed);
- (g) Identify and report the **channel** (bilateral, regional or multilateral);

B. Underlying assumptions, definitions and methodologies

131. Developing country Parties **should** describe the underlying assumptions, definitions and methodologies, including, **as applicable**, those used to:

- (h) Identify and report the **type of support** (mitigation, adaptation or cross-cutting);
- (i) Identify and report the financial **instrument** (grant, concessional loan, non-concessional loan, equity, guarantee or other);
- (j) Identify and report **sectors** and subsectors;
- (k) Report on the **use, impact and estimated results** of the support needed and received;
- (l) Identify and report support as contributing to **technology** development and transfer and **capacity-building**;
- (m) **Avoid double counting** in reporting information on support needed and received for the implementation of Article 13 of the Paris Agreement and transparency-related activities, including for transparency-related capacity-building, when reporting such information separately from other information on support needed and received.

C. Information on financial support needed

Textual Format

[to the extent possible and as available and as applicable] :

- Sectors for which the Party wishes to attract international finance, including existing barriers to attracting international finance;
- Description of how the support will contribute to its NDC and to the long-term goals of the Paris Agreement.

C. Information on financial support needed- Tabular Format

Table III.6

Information on financial support needed by developing country Parties under Article 9 of the Paris Agreement^{a, b}

Exchange rate used: _____

Sector ^e	Subsector ^e	Title of activity, programme, project or other ^{e, d}	Programme/ project description ^e	Estimated amount (climate-specific) ^e		Expected time frame ^e	Expected financial instrument ^e	Type of support ^e	Contribution to technology development and transfer objectives ^e	Contribution to capacity-building objectives ^e	Whether the activity is anchored in a national strategy and/or an NDC ^e	Expected use, impact and estimated results ^e	Additional information ^f
				Domestic currency	USD								
Energy							Grant	Adaptation	Insert 1 for Yes, 0 for No	Insert 1 for Yes, 0 for No	Insert 1 for Yes, 0 for No		
Transport							Concessional loan	Mitigation					
Industry							Non-concessional loan	Cross-cutting ^e					
Agriculture							Equity						
Forestry							Guarantee						
Water and sanitation							Insurance						
Cross-cutting							Other (specify) ^d						
Other (specify) ^d													

Where can we find this type of information?

Notation keys: NA = not applicable; UA = information not available at the time of reporting; NR = not reported (to indicate the voluntary character of the information).

^a Developing country Parties should provide, in a common tabular format, information on financial support needed, to the extent possible, as available and as applicable.

^b Parties include information on support needed from the reporting year of the BTR.

^c Parties provide the underlying assumptions, definitions and methodologies, as applicable, used to identify and/or report this reporting parameter in the respective section of the BTR.

^d If "other", Parties should specify this information.

^e This refers to funding for activities that have both mitigation and adaptation components.

^f Report, to the extent possible, information on the project/programme and implementing agency and provide a link to any relevant documentation and as appropriate, support to activities related to averting, minimizing and addressing loss and damage associated with the adverse effects of climate change.

...

Climate Finance

Name	Brief Description	Type	Focus	(in million)	Project Size	Administered By	Link
Adaptation Fund	The fund finances projects and programmes that help vulnerable communities in developing countries which are parties to the Kyoto Protocol adapt to climate change effects. The fund is suitable for the Caribbean because it has ecosystem-based approaches and direct access and access through multilateral channels is possible.	Multilateral	Adaptation	USD 755.46	Small/Medium	UNFCCC	View
Clean Technology Fund (CTF)	One of two multi-donor Trust Funds within the Climate Investment Funds, promoting scaled-up financing for demonstration, deployment and transfer of low-carbon technologies with significant potential for long-term greenhouse gas emissions savings. Suitable for Caribbean countries in a regional context for projects which target a Caribbean specific technical issue.	Multilateral	Mitigation	USD 5461.91	Medium/Large	World Bank	View

Not in NAP	77		5.1	0.6
Total	800.6	100.0	46.7	3.9

Grenada's TNA contributes to the following Sustainable Development Goals:

Priority technologies for adaptation

- Agriculture sector
 - Micro-sprinklers
 - Drip irrigation
- Water resources sector
 - Micro-dams
 - Rainwater harvesting

Priority technologies for mitigation

- Energy sector
 - Solar photovoltaic light-emitting diodes
 - Biogas
 - High-efficiency heating, refrigeration and air-conditioning systems

Example Ghana - Technology support needed

Table 50: Overview of technology development and transfer support needed

Sector	Subsector	Title of activity, programme, project	Programme/project description	Type of support	Type of Technology	Expected time frame	Expected use, impact and estimated results
Water	Water harvesting and management	Rainwater collection from ground surfaces (RCS).	Collection, storage and use of rainfall that lands on the ground as opposed to collection from roofs with the intention for multi-purpose use in the communities. In many water-poor areas, small-scale runoff collection infrastructure can contribute significantly to the volume of freshwater available for human consumption and other versatile applications.	Adaptation	hard	2020-2030	Addresses insufficiency of water to support the livelihoods of rural communities, resulting in poor community health and poor school attendance, particularly for the girl-child
		Post-construction support for community-managed water systems (PCS).	Facilitates community ownership, management and maintenance of water systems, promotes women's participation in their management and improves system performance and sustainability.	Adaptation	hard	2020-2030	Increasing the success and sustainability of community-managed water systems through existing government initiatives.
	Water storage	Water storage and treatment	The support will address water scarcity and quality issues in rural communities by implementing a sustainable water storage and treatment system. The system will involve the construction of a communal water storage tank, a water filtration system, and a rainwater harvesting system.	Adaptation	hard	2020-2030	A communal water storage tank, a water filtration system, and a rainwater harvesting system were constructed. Water scarcity and water quality issues in rural communities addressed

F. Information on Technology Development & Transfer (support received)

Textual Format

[to the extent possible and as available and as applicable] :

- (a) Case studies, including key success and failure stories;
- (b) How the support contributes to technology development and transfer, endogenous capacities and know-how;
- (c) The stage of the technology cycle supported, including research and development, demonstration, deployment, diffusion and transfer of technology.

F. Information on Technology Development & Transfer (support received)- Tabular Format

Table III.9

Information on technology development and transfer support received by developing country Parties under Article 10 of the Paris Agreement^{a, b}

Highlighted Checks when reporting in the CTFs

- Frequency of Reporting
- Use of Notation Keys
- Linkage between CTF and BTR section that describes methodologies, underlying assumptions and definitions used
- Providing additional information including on support to activities related to averting, minimizing and addressing loss and damage associated with climate change impacts

February 18 – 21, 2025,

Saint Georges, Grenada

Brittany Meighan Rancharan
CBIT-GSP Regional Coordinator, Anglophone Caribbean
UNEP Copenhagen Climate Centre
brittany.meighan@un.org

Exercise (45 minutes)

1. Break into pairs and open the **Support Received Template**
2. Open Grenada's latest relevant national report, today we'll use your **NC2**.
3. Search for the "**Support received**" section
4. Each pair, choose **2-3 projects** (let's get a variety in the room!)
5. Starting with **Financial Support**, for those 2-3 projects, use the available data within the BUR to fill in the CTF table (remember to also use your notation keys!)
6. List the information categories you did not find, had problems finding, and/or that you might still have some questions/reservations about using for your BTR
7. If you complete 2-3 projects for Financial Support, then try **Technology Support** and **Capacity Support**. (Does information availability differ between Financial, technology, and Capacity?)
8. Come back to the plenary to share reflections (20 minutes)
