How have you addressed and integrated gender considerations in the transparency practice in your country?

**The causes of climate change
are not gender-neutral**

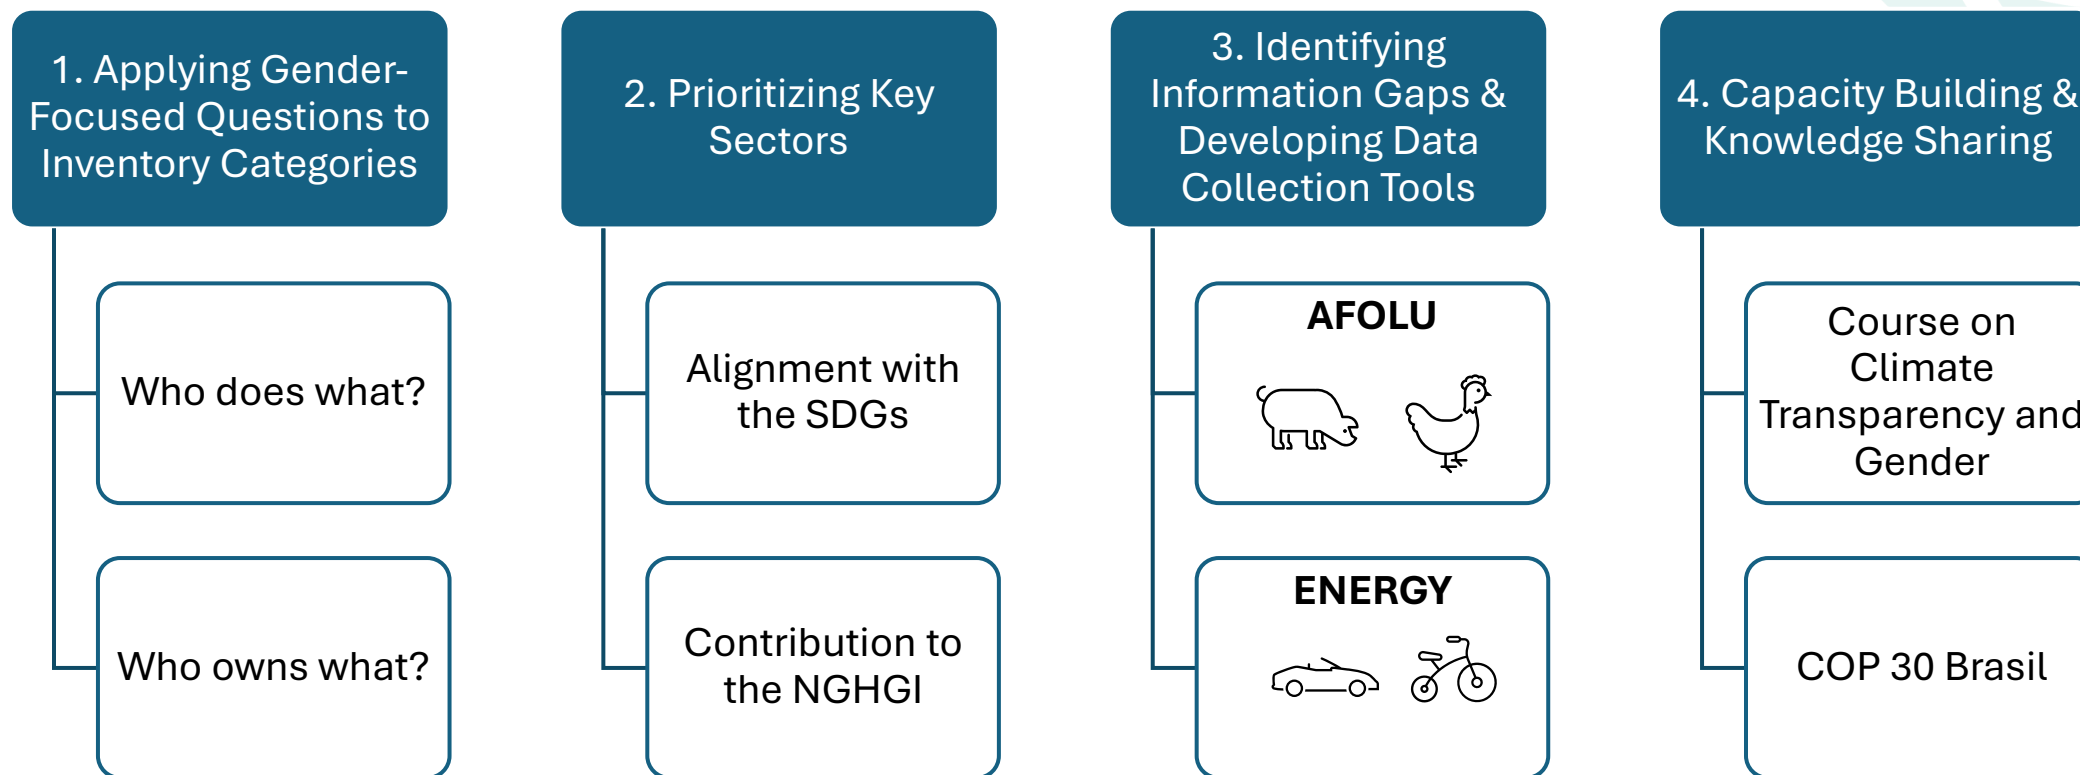

A structural perspective on
social and cultural causes of
global warming

**A gender perspective strengthens
climate transparency**

Quantitative and qualitative information
for understanding emission activities
from an intersectional and gender
perspective

Country: Colombia

How have you addressed and integrated gender considerations in the transparency practice in your country?

Country: Colombia

Country practice: Methodology for incorporating a gender perspective in Greenhouse gas emissions accounting and reporting mechanisms

What are the important lessons learned from your practice and which advice would you provide to other countries?

- ✓ Engage key actors
- ✓ Strengthen institutional knowledge
- ✓ Building a bridge between gender equality & climate action agenda

Country: Colombia
