UNEP DTU
PARTNERSHIP

CBIT Global Coordination Platform

- The CBIT Global Coordination Platform was launched in April 2017 and is now fully operational
- The CBIT Global Coordination Platform is funded by the GEF and jointly implemented by UN Environment and UNDP with UNEP DTU Partnership as executing partner.
- The platform will enable coordination, maximize peer learning opportunities, and enable knowledge sharing to facilitate transparency enhancements among countries with CBIT projects.
- The platform will engage countries, the GEF Partner Agencies, and other relevant entities and institutions with related programming activities to enhance partnership of national, multilateral, and bilaterally supported capacity-building initiatives

Interactive session:

Question 1: What is the 4th project outcome in Mongolia's CBIT project?

Question 2: For which project is Benti Firdissa focal point?

Question 3: Which country under implementation has reported progress on project implementation?

The screenshot shows the CBIT platform website. At the top, there is a "WELCOME!" message with a background image of a boat on a dry riverbed. Below this, it states: "This platform facilitates coordination and knowledge management for the Capacity-building Initiative for Transparency." A "KNOW MORE" button is visible. The main section is titled "CBIT PROJECTS" and includes a search bar "Search a country". Below the search bar is a world map with color-coded regions. A legend titled "STATUS" provides the following data:

| Status | Count |
|----------------------|-------|
| Concept approved | 29 |
| Project approved | 2 |
| Under implementation | 15 |
| Concluded | 0 |
| No project | - |

GLOBAL SUPPORT PROGRAMME

Main components: General information about CBIT projects

TITLE

Strengthening capacity in the agriculture and land-use sectors in Mongolia for enhanced transparency in implementation and monitoring of Mongolia's Nationally Determined Contribution (NDC) under the Paris Agreement

OBJECTIVE

By 2020, Mongolia is preparing reports to the UNFCCC under the Paris Agreement Enhanced Transparency Framework (ETF) with strengthened agriculture, forestry and other land use sector components including inventories of emissions sources and sinks and information necessary to track progress against priority actions identified in Mongolia's NDC for these sectors.

GEF PROJECT DETAILS

[See in GEF website](#)

GEF PROJECT GRANT

USD 863.242

STATUS: [Under implementation](#)

CONCEPT APPROVAL: [1 June 2017](#)

PROJECT DOCUMENT APPROVAL: 19 November 2018

START DATE: 21 January 2019

END DATE: 21 January 2022

IMPLEMENTING AGENCIES: [Food and Agriculture Organization](#)

EXECUTING AGENCIES: [Ministry of Environment and Tourism of Mongolia](#)

PROJECT OUTCOMES

Institutional arrangements coordinating information and data from the agriculture and land use sectors into ETF processes and reports enhanced.

Best practice ETF reporting process, information gathering, system infrastructure and module sharing with relevant priority national sectors and regional CBIT agriculture and land use ETF programme.

Reporting on inventories of emissions sources and sinks and emissions reduction activities from agriculture and land-use sector strengthened.

STAKEHOLDERS

Ministry of Environment, Development and Green Tourism (MOET) - Climate Change Project Implementation Unit

Ministry of Food, Agriculture and Light Industry (MAFALI)

Water Authorities

National Agency for Meteorology and Environmental Monitoring (NAMEM)

Administration of Land Affairs, Geodesy and

KNOWLEDGE MANAGEMENT APPROACHES

Dissemination and maintenance of on-line based database and learning forums

Promotion of knowledge sharing culture and coordination, including enhanced transparency framework best practice sharing with other relevant sectors

Main components: Meet the focal point of the project

MEET THE FOCAL POINT OF THE PROJECT

Benti Firdissa

I am Benti Firdissa Dugassa, i work in Environment, Forest and Climate Change Commission. I have M.Sc. degree in Environmental Science and Technology graduated from Jimma University and now PhD candidate in Environmental Science at Addis Ababa University. Prior and after my MSc studies, I had got more than 12 year work experience in different governmental and nongovernmental organization as a Climate Resilience Green Economy/CRGE team leader, senior Environmental expert (ESIA, chemist, Environmental pollution control researcher, vehicular Emission data collector and analyst.). Now I am working at Environment, Forest and Climate change Commission /EFCCC acting as MRV Directorate Director.

Main activities and responsibilities:-

- Coordinating the national MRV system.
- Coordinate and participate the preparation of national communication (NC) and binomial updates report (BUR).
- Coordinate and participate the line ministries to collect analysis and prepare the GHG emission reduction reports.
- Coordinate and participate on Verifying the reports come from line ministries regarding the GHG emission and reduction.
- Coordinate and participate on national GHG emission reduction assessments and preparing action plan for problem tracing.
- Preparing material for training and deliver training for the expertise of federals, regions and City administration on MRV system according to the IPCC 2006 guidelines regarding the four pillars (Energy, Waste, IPPU and AFOLU).
- Coordinating different projects come from NGO for

GLOBAL SUPPORT PROGRAMME

UN environment

UNEP DTU PARTNERSHIP

Main components: Project implementation - progress

STATUS OF PROJECT OUTPUTS AND ACTIVITIES

1.1 Establishment of an efficient and articulated institutional framework that allows the development of transparency-related activities

1.1.1 National Transparency Task Force established, building on existing institutional framework (SNRCC)

A1. Define, within the SNRCC, the integration and responsibilities, as well as the modality and term for the establishment of the task force.

A2. Define members' roles, frequency of meetings, and continuity agreement after project completion

1.1.2 Capacity building needs and gaps assessment of the institutional enabling environment for transparency developed

B1. Identify the roles and responsibilities of national institutions

B2. Analyze capacity building needs and gaps through a self-assessment, using for example the self-assessment tool to be available in the CBIT Global Coordination Platform

1.1.3 Capacity building program for the Ministry of Housing, Land Planning and Environment and other relevant institutions in the SNRCC to develop initiatives to enhance transparency designed and implemented, with a gender responsive approach

C1. Based on the analysis of capacity building needs and gaps, define the thematic contents for a capacity building program focused on definition and tracking of NDC objectives, mitigation and adaptation measures, and their MRV

C2. Assess the need to include sectoral thematic contents to support the identification, progress, and effects of mitigation and adaptation measures in the NDC, and monitoring of progress of sectoral adaptation plans

A few examples on how to benefit from the platform:

- i) Follow the implementation of CBIT project outputs and reach out to the Country Focal Point to learn from the implementation of a specific output of interest.
- ii) When designing CBIT projects, the platform provides easy access to understand what other projects focus on and what the progress indicators are. If you are about to design a CBIT project, it is an excellent way to get inspiration to shape the project.
- i) Yearly self-assessment of capacity will help countries to bridge the gaps in their transparency systems
- ii) Webinars and other knowledge exchange services

GLOBAL SUPPORT
PROGRAMME

UN
environment

UNEP DTU
PARTNERSHIP

We are all part of the global CBIT family!

- i) To maximize the impact of the CBIT Global Coordination Platform, it is essential that all Country Focal Points invest time in updating country profiles and actively participate in coordination and peer learning opportunities
- i) The annual in-person workshops provide a space to create networks and facilitate peer-learning
- ii) Welcome to the CBIT family and feel free to get in touch if you have questions or suggestions on how to improve this common space for all of us!

Self-assessment tool - early findings

What: country's own assessment of capacity for transparency

Questionnaire with 4 sections, covering the information to be provided to UNFCCC, as defined in the ETF:

- GHG inventory
- Progress made in implementing and achieving NDCs
- Climate change impacts and adaptation
- Financial, tech transfer, and capacity-building support needed and received

Self-assessment tool is administered through the CBIT Platform

40 CBIT countries (out of 42) submitted data

Assessment of capacity for reporting national GHG inventory

● Cluster1 Median = 45

- Bosnia-Herzegovina
- Cuba
- Eswatini
- Lao PDR
- Lebanon
- Mongolia
- Papua New Guinea
- Uganda

● Cluster3 Median = 62

- Antigua & Barbuda
- Azerbaijan
- Costa Rica
- Cote d'Ivoire
- Dominican Republic
- Ethiopia
- Georgia
- Honduras
- Madagascar
- Morocco
- Nicaragua
- Panama
- Sierra Leone
- Togo

● Cluster2 Median = 75

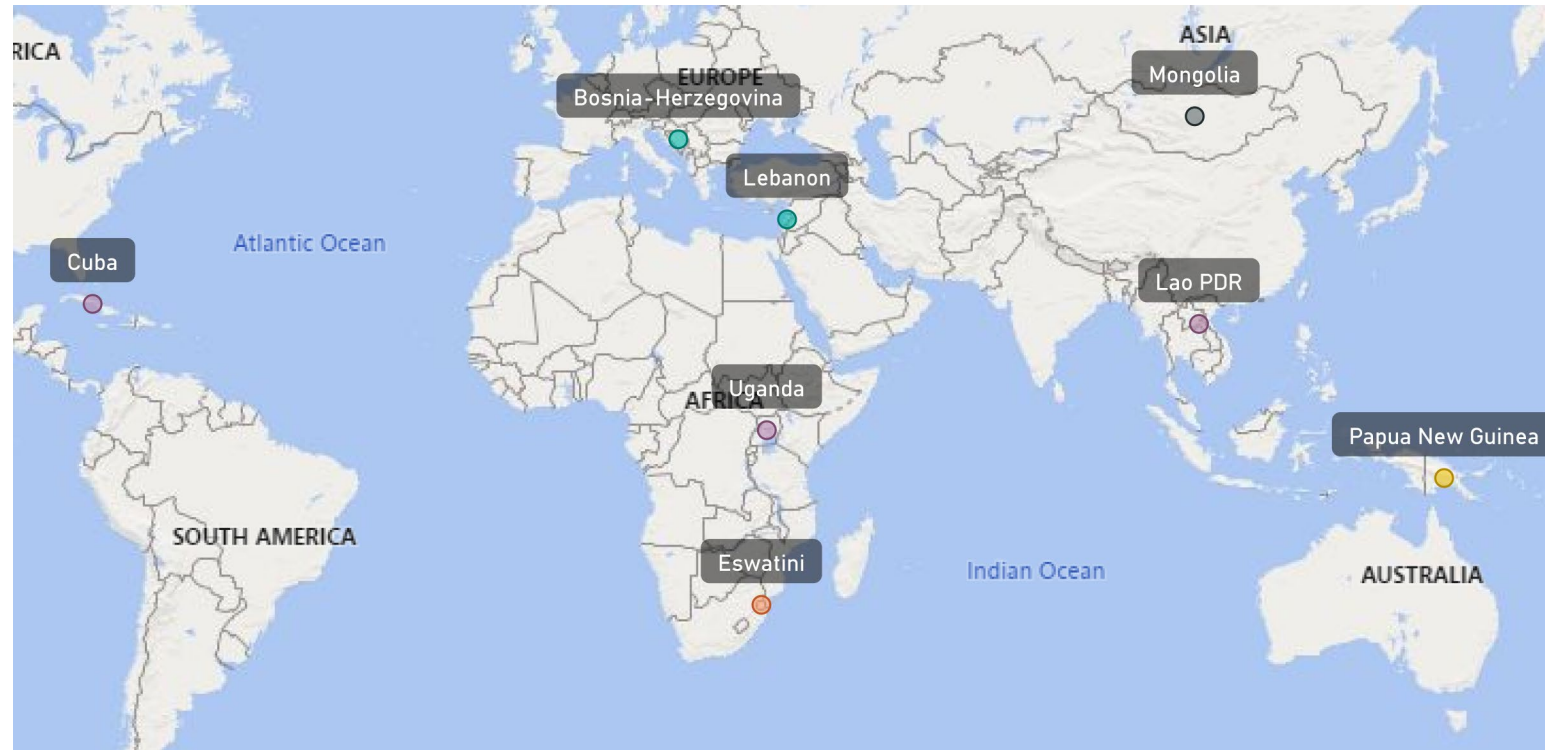

- Argentina
- Burkina Faso
- Cambodia
- Chile
- Colombia
- Ghana
- Jamaica
- Kenya
- Liberia
- Mexico
- Montenegro
- North Macedonia
- Peru
- Rwanda
- Serbia
- South Africa
- Sri Lanka
- Uruguay

Assessment of capacity for national GHG inventory vis-à-vis reporting history to UNFCCC
